AN INTRODUCTION TO THE STUDY OF TERRA SIGILLATA

TREATED FROM A CHRONOLOGICAL STANDPOINT

By FELIX OSWALD AND T. DAVIES PRYCE

With 83 Plates of Illustrations and a Map. 4to. **42s.** net.

The work deals fully with the red-glazed pottery (the so-called Samian Ware)
of the Roman Imperial Period.

"As a guide to arranging specimens and to the literature of the subject, this volume is certainly the best yet published, and should prove of great assistance to museum curators and future excavators who have to date and classify this kind of pottery."—*Museums Journal*.

"The book is well indexed and must form a standard work of reference, indispensable to every ceramic museum and every serious collector of ancient pottery."—*The Connoisseur*.

"It is the first attempt made in this country to produce a handbook to the study of this pottery. . . . We most heartily congratulate the authors on their work, which is distinguished both by exhaustive knowledge and by scientific accuracy."—*Nature*.

"Indispensable to the student of Roman Britain."—*The Times*.

"To students of Roman archaeology this elaborate treatise on what is commonly called 'Samian' ware, from the chronological standpoint, will be of the greatest value."—*The Spectator*.

"The work which is now before us provides the first comprehensive study of the subject which has appeared in English. It is a book that will be warmly welcomed by Roman archaeologists and particularly by those concerned with Roman remains in Britain."—*English Historical Review*.
