- Sarah Wigglesworth** Sarah Wigglesworth Architects, UK
- Jianfei Zhu** The University of Melbourne, Australia

COVER

Silvia Alonso de los Ríos explores Peter Märkli's ways of intervening in architectural heritage from the perspective of collective memory, demonstrated through examples including a housing project for Pontresina village in the high eastern Swiss Alps. See pp. 212–230.

leader	203	<b>Cultures of mathematics in architecture</b>
report	204	<b>On Cloud Studies</b> Fadi Shayya and Stephen Walker.
design	212	<b>New architecture, inherited legacy: heritage, memory, grammar, and invention in the work of Peter Märkli</b> Silvia Alonso de los Ríos surveys projects from the last two decades of Swiss architect Peter Märkli's work, examining relationships between new and old, heritage and contemporary design, architectural grammar and in-vention.
history	231	<b>James Stirling's post-avant-garde collage: the flatbed picture plane &amp; the pursuit of virtuality</b> Francesco Proto challenges interpretations that identify James Stirling's early work as European late modernism, repositioning it within the theory and practice of American neo-avant-garde pop art.
theory	245	<b>Points and lines, nodes and rods: megastructure, graph realism, and Yona Friedman's Scientific Architecture</b> Theodora Vardouli considers Yona Friedman's theoretical writings on the Spatial City through the aesthetic and intellectual attributes of mathematical objects that he encountered during appointments in North American re-search universities.
	255	<b>Geometries with agency: mathematics of form revisited</b> Daniel Norell examines the agency of mathematics in architecture by revis-iting Greg Lynn's notion of 'mathematics of form' and reviewing current use of physics simulation through this lens.
urbanism	266	<b>Making relationships: interpreting the dialogical field of an architectural project as a design object</b> Thomas-Bernard Kenniff reviews Barking Town Square using Bakhtin's dia-logic theory, offering insights into the production of design knowledge generated from the manipulation of a project's relational field.
research	278	<b>Architectural research in university schools of architecture: Cambridge and the Bartlett, 1960–9</b> Natcha Ruamsanitwong and James W. P. Campbell reflect on two distinct scientific approaches to architectural research developed at the schools of architecture at Cambridge and the Bartlett, UCL in the 1960s.
erratum	288	<b>Forgoing the architect's vision: American home economists as pioneers of participatory design, 1930–60</b> Anna Myjak-Pycia
