

K. E. HARE and T. C. O'NEIL	<i>N</i> -fold sums of Cantor sets.	243
K. J. FALCONER and R. D. MAULDIN	Fubini-type theorems for general measure constructions	251
M. JIMÉNEZ SEVILLA and J. P. MORENO	A note on porosity and the Mazur intersection property	267
W. MARCISZEWSKI	On properties of metrizable spaces <i>X</i> preserved by <i>t</i> -equivalence	273
L. BARKER	The discrete fractional Fourier transform and Harper's equation	281
J. M. R. SANJURJO	Lusternik–Schnirelmann category and Morse decompositions	299
M. SCHECHTER	Multiple solutions for semilinear elliptic problems	307
M. S. P. EASTHAM	The convexity of the spectral function in Sturm–Liouville problems	319
D. J. GILBERT and B. J. HARRIS	Bounds for the points of spectral concentration of Sturm–Liouville problems.	327
P. A. KRUTITSKII	The integral representation for a solution of the 2-d Dirichlet problem with boundary data on closed and open curves.	339
P. A. KRUTITSKII	Scattering of tidal waves by reefs and spits	355
T. HAUSEL, E. MAKAI, JR. and A. SZÜCS	Inscribing cubes and covering by rhombic dodecahedra via equivariant topology	371
BOOK REVIEWS	399
