

FPS GENERAL MEETINGS

There will be four general meetings of the Society in the autumn, all at 5.30 p.m. in the new Meeting Room of the Zoological Society of London, in the Outer Circle, Regent's Park.

On Tuesday, September 13th, Mr H. H. Roth, of FAO, will talk on FAO's wildlife conservation programme, and Colonel Mervyn Cowie, our new Vice-President, will show a wildlife film of Samburu and other northern parts of Kenya.

On Tuesday, September 20, Mr Roger Wheeler, Warden of Murchison Falls National Park, Uganda, will give an illustrated talk on "Management Problems in a Uganda National Park." This will be preceded, at 3.00 p.m., by a Reunion Meeting for those who went on the two FPS East African tours last February, at which films and slides taken on the tour will be shown. If any member who is going on the 1967 East African tour, or any other member, would like to attend this meeting please inform the Administrative Secretary so that teas can be ordered.

On Tuesday, October 27, Dr David Harrison, author of "Mammals of Arabia," will give an illustrated talk on "The Status and Conservation of Larger Mammals in Arabia."

On Thursday, December 1, Mr James Hancock will talk and show slides about the Everglades National Park in Florida and the disastrous results of draining the water from the Park.

FPS FIELD MEETING

A field meeting will be held in the New Forest on Saturday, October 22, to see the fallow deer in the rutting season. As an early start will be necessary, members are advised to stay the previous night in Lyndhurst, Fordingbridge, Ringwood, or nearby in the north-west quadrant of the Forest. One hotel is the Compton Arms, Stoney Cross, near Lyndhurst. Sir Dudley Forwood, a member of the FPS Council, has kindly invited members to a buffet lunch on Saturday, and it is also hoped to arrange a showing of some of Mr Eric Ashby's fine films of the forest on the Friday evening. Please write to the Administrative Secretary for details.

FPS TOUR TO INDIA

The Society is planning a tour to visit wildlife reserves in India probably in February, 1968. We should be glad to hear from any members who would be interested in joining this so that we can have some idea of numbers.
