International Journal of Technology Assessment in Health Care

Official Journal of Health Technology Assessment International

Editor-in-Chief

Marjukka Mäkelä, M.D., Ph.D., M.Sc.

Research Professor, FINOHTA (Finnish Office for Health Technology Assessment)
at THL (National Institute for Health and Welfare)

P.O. Box 30

00271 Helsinki, Finland

Telephone: +358 29 524 7290

Email: marjukka.makela@thl.fi

Aims and Scope: The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Publishing, Advertising, and Subscription Offices: Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK (for U.K. and elsewhere).

2013 Subscription Information: *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623)

is published quarterly in January, April, July, and October by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473; Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual institutional subscription rates for Volume 29 (2013): Institutions online only US \$509.00, and online only UK and elsewhere £292.00. Individuals online only US \$268.00, and online only UK and elsewhere £151.00. Single part: US \$160.00 in the U.S.A., Canada and Mexico; UK £92.00 and elsewhere. Online only for all institutions. Print editions ceasing for 2013. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

CONTENTS

EDITORIAL

- 1 Volume 28: Statistics and Thanks
Marjukka Mäkelä and Terhi Ilonen

ASSESSMENTS

- 3 Cost-utility analysis of NT-proBNP-guided multidisciplinary care in chronic heart failure
Deddo Moertl, Sabine Steiner, Doug Coyle, and Rudolf Berger
- 12 Transcatheter aortic valve implantation for severe aortic stenosis: The cost-effectiveness case for inoperable patients in the United Kingdom
Aileen Murphy, Elisabeth Fenwick, William D. Toff, Matthew P. Neilson, Colin Berry, Neal Uren, Keith G. Oldroyd, and Andrew H. Briggs
- 20 Medical technology at home: safety-related items in technical documentation
Ellen S.M. Hilbers, Claudette G.J.C.A de Vries, and Robert E. Geertsma
- 27 Cost-utility of waiting time in total joint replacements: A randomized clinical trial
Ulla Tuominen, Harri Sintonen, Pasi Aronen, Johanna Hirvonen, Seppo Seitsalo, Matti Lehto, Kalevi Hietaniemi, and Maria Blom
- 35 Should chronic hepatitis B be treated as early as possible?
Frank Hulstaert, Christoph Schwierz, Frederik Nevens, Nancy Thiry, Mohamed Gamil, Isabelle Colle, Stefaan Van de Sande, and Yves Horsmans
- 42 Automated screening audiometry in the digital age: exploring uhearTM and its use in a resource-stricken developing country
Katijah Khoza-Shangase and Lisa Kassner
- 48 Benefits of continuous subcutaneous insulin infusion on quality of life
Andrea Lukács, Emőke Kiss-Tóth, Beatrix Varga, Andrea Soós, Peter Takác, and László Barkai

METHODS

- 53 Economic evaluations and diagnostic testing: An illustrative case study approach
Sabina Sanghera, Rosanna Orlando, and Tracy Roberts
- 61 Approaches to chronic disease management evaluation in use in Europe: A review of current methods and performance measures
Annalijn Conklin, Ellen Nolte, and Hubertus Vrijhoef
- 71 Supporting decision making in cross-border regions: A health technology assessment tool for hospitals
Saskia Knies, Gloria Lombardi, Matt Commers, Hans-Peter Dauben, Silvia Evers, Kai Michelsen, Wija Oortwijn, Chibuzo Opara, and Helmut Brand

POLICIES

- 79 Involvement of consumers in health technology assessment activities by INAHTA agencies
David Hailey, Sophie Werkö, Rugayah Bakri, Alun Cameron, Britta Göhlen, Susan Myles, Jasmine Pwu, and Jomkwan Yothasamut, For the INAHTA Working Group on Impact of HTA

- 84** Assessing the impact of health technology assessment on the Austrian healthcare system
Ines Schumacher and Ingrid Zechmeister
- 92** Relationship between financial impact and coverage of drugs in Australia
Josephine Mauskopf, Costel Chirila, Catherine Masaquel, Kristina S. Boye, Lee Bowman, Julie Birt, and David Grainger
- 101** A review of health technology appraisals: Case studies in oncology
Koonal Kirit Shah, Jorge Mestre-Ferrandiz, Adrian Towse, and Emily Nash Smyth

LETTER

- 110** An ethical evaluation of telemedicine applications must consider four major aspects – A comment on kidholm et al.
Arne Manzeschke, Karsten Weber, Heiner Fangerau, Elisabeth Rother, Friederike Quack, and Kathrin Dengler

CORRIGENDA

- 112** Transcatheter aortic valve implantation for severe aortic stenosis: The cost-effectiveness case for inoperable patients in the United Kingdom – CORRIGENDUM
- 113** Approaches to chronic disease management evaluation in use in Europe: A review of current methods and performance measures – CORRIGENDUM
