TEMPORAL BONE SURGICAL DISSECTION COURSE

OFFERED BY

THE DEPARTMENT OF OTOLARYNGOLOGY

THE UNIVERSITY OF MICHIGAN MEDICAL SCHOOL, ANN ARBOR, MICHIGAN

COURSE DIRECTOR: STEVEN TELIAN, M.D.

1992: 16-20 November

1993: 3-7 May, 24-28 May, 18-22 October, 8-12 November

Intensive one-week courses emphasize the surgical and anatomical approaches to the temporal bone, and are presented in a manner relevant for the otologic surgeon, utilizing lectures, videotapes, and dissection.

Mornings and afternoons are spent in the dissection laboratory, giving extensive drilling experience in temporal bone anatomy and surgical techniques. All instruments and high-speed handpieces will be provided.

Course fee: Physicians \$1,000; Residents \$750.

For further information write:

Steven Telian, M.D.,
Taubman Medical Center,
1500 E. Medical Center Drive,
Ann Arbor,
Michigan 48109-0312, U.S.A.
Tel: (313) 936-7633.

ANNOUNCEMENT

The 28th Postgraduate Course in Ear Surgery will be held from April 18–April 23, 1993 in Nijmegen, The Netherlands.

For further information and registration form, please write to:

Professor Dr P. van den Broek,
University Hospital Nijmegen,
Department of Otorhinolaryngology,
P. O. Box 9101,
6500 HB Nijmegen,
The Netherlands.
Fax: 080-540251

**XV. WORLD CONGRESS OF OTORHINOLARYNGOLOGY
HEAD AND NECK SURGERY
20 - 25 June, 1993
İSTANBUL - TÜRKİYE**

**Under the Auspices of the International Federation of Otorhinolaryngological Societies (IFOS)
Scientific Programme
Five Plenary Sessions, Forty Round Tables and Eight IFOS Standing Committee Panels
Five lectures, Workshops, Instructional Sessions

**UNIVERSITY OF SOUTHAMPTON
INSTITUTE OF SOUND AND VIBRATION RESEARCH
CLINICAL AUDIOLOGY COURSE**

29 March–2 April 1993

The next annual course has been arranged by the ISVR for 29 March–2 April 1993. It is an advanced audiology course aimed primarily for specialists in otolaryngology and trainees in the specialty. It will be of particular benefit for consultants, senior registrars, registrars and for all candidates who are preparing for the final ENT fellowship examinations. The course contains information and demonstrations of the latest audiological and vestibulometric techniques.

Subjects covered will include:

- the patient with hearing loss and differential testing
- the medico-legal case
- the dizzy patient
- rehabilitation of the hearing impaired and tinnitus
- paediatric audiology
- auditory electrophysiology

Further details from:

Ann Barrett,
ISVR Conference Secretary,
The University Southampton,
Hants. SO9 5NH,
UK

Telephone: 0703 592310; Fax: 0703 593033

The 29th Head and Neck Course

The course this year will be held in Edinburgh from **21–23 January 1993**.

Further details available from Mrs A. White, Otolaryngology Unit, Lauriston Building, The Royal Infirmary, Edinburgh EH3 9EN.

The course fee is £310.00 and the Faculty includes Professor A. G. D. Maran, Professor G. Snow and Mr D. Howard.

Instructions to Authors

Review Articles. Articles of this type, preferably not exceeding 3,000 words will be considered but the author(s) are expected to be a recognised authority on the topic and have carried out work of their own in the relevant field.

Historical Articles. Articles of this type are generally encouraged, but it is obvious that they have to provide some new information or interpretation, whether it be about a well-known person or for example an instrument associated with him, but those from within a Hospital's own department who have made a hitherto less well-known contribution would be welcome.

Letters to the Editor. This feature has been re-introduced to give those who wish to comment about a paper previously published within the Journal, an opportunity to express their views. Wherever possible, the original author is asked to add his further comment, thereby adding to the value of the contribution. Such letters should be sent as soon as possible after publication of each month's issue of the Journal in the hope of including them early thereafter.

'Mini-papers, such as those which appear in the British Medical Journal, Lancet, or New England Journal of Medicine, will not be acceptable except on the rare occasion that they bring information of immediate interest to the reader.

Pathology. Articles which are of pathological interest with particular emphasis on the way the diagnosis was achieved now appear on a monthly or bi-monthly basis. It is hoped that clinicians will involve their pathologists in these reports, and all illustrations must be of first-class quality. Where a department, particularly those overseas, may not have such specialized facilities, it may be possible, if a block or several unstained sections are provided for our Adviser to produce or supplement the illustration submitted. Only contributions of particular pathological interest will be accepted.

Radiology. Short reports on cases in which the radiology has been crucial in the making of the diagnosis or the management of a particular case now appear on a monthly or bi-monthly basis. This spot is to encourage clinicians and radiologists to produce material of particular interest in the specialty and to encourage co-operation in this field. Only presentations with first-class illustrations can be accepted and these must emphasise a problem of unusual clinical interest.

Short Communications. This feature will be used on an occasional basis. Examples of material suitable for inclusion under this title would be, for example: a piece of work which was of clinical interest but had failed to produce findings which were of statistical significance; where an investigative technique has been applied to an allied field, not warranting a further in-depth description of its earlier application and methodology.

'**Silence in Court**'. Articles on medicolegal topics are welcome but a preliminary letter written beforehand is requested to ensure that the contribution would be appropriate.

Check List for Authors/Secretaries

1. Title page—Titles should be short with names of the authors, higher degrees only and the city/country. Details of the departments in which the authors work should be put lower down.
An address for correspondence should be supplied together with the author who should receive this; this will ultimately appear beneath the list of references. If the paper was presented at a meeting, the details of this must be given and will be inserted at the bottom of the first page of the printed script.
2. Abstract—No paper will be accepted without this and it adds considerably to the Editor's time to have to write and request this if the paper is accepted.
3. Key Words—only those appearing as Medical Subject Headings (MeSH) in the supplement to the Index Medicus may be used; where appropriate word(s) are not listed those dictated by common sense/usage should be supplied.
4. To follow the instructions to Authors with the way in which the paper is set out. It is preferred that each section should start on a fresh page with double spacing and wide margins.
5. References must be in the Harvard system; to submit a paper using the Vancouver system is automatically to have it returned or rejected.
6. Two sets of illustrations must be included, one of half-plate size and the other with the width of 80 mm. Illustrations must be clearly labelled with the author's name on the reverse side and where appropriate with an arrow to give orientation.
7. Authors to check manuscript and references to see that these match up particularly for dates and spelling.
8. Title of Journals must be given in full with the date, volume number and first and last pages.
9. Consent to be obtained from a patient if a photograph of their face is to be reproduced.
10. If the author to whom correspondence is to be directed changes his address, he should let the Editorial Office know as soon as possible.
11. Page proofs will normally be sent out one month in advance and must be returned as soon as possible.
12. Authors should provide a Facsimile number (FAX) whenever possible to speed communication. The FAX number of the Editorial office is 0483 306380.
13. Manuscripts with tables only may be transmitted by FAX; those with graphic or visual illustrations, e.g. graphs, X-rays, pathology, electrical records (ENG, BSER etc) must continue to be sent by post as the quality of reproduction does not give sufficient accuracy of detail.
