489 Viscous effects on the acoustics and stability of a shear layer over an impedance wall
D. Khamis & E. J. Brambley

535 Transitions and oscillatory regimes in two-layer geostrophic hetons and tripoles
B. Shteinbuch-Fridman, V. Makarov & Z. Kizner

554 A statistical mechanics approach to mixing in stratified fluids
A. Venaille, L. Gostiaux & J. Sommeria

584 Rayleigh–Taylor mixing between density stratified layers
R. J. R. Williams

JFM Rapids (online only)

R1 Experimental particle paths and drift velocity in steep waves at finite water depth
J. Grue & J. Kolaas

S indicates supplementary data or movies available online.

- 1 On the strength of the weakly nonlinear theory for surface gravity waves
M. Stiassnie
- 5 Radiation of short waves from the resonantly excited capillary-gravity waves
M. Hirata, S. Okino & H. Hanazaki
- 25 On the behaviour of impinging zero-net-mass-flux jets
C. S. Greco, G. Cardone & J. Soria
- 60 Energy efficiency and performance limitations of linear adaptive control for transition delay
N. Fabbiane, S. Bagheri & D. S. Henningson
- S 82 Insights into the dynamics of spray-swirl interactions
K. Rajamanickam & S. Basu
- 127 Extrusion of fluid cylinders of arbitrary shape with surface tension and gravity
H. Tronnolone, Y. M. Stokes & H. Ebendorff-Heidepriem
- 155 Added mass energy recovery of octopus-inspired shape change
S. C. Steele, G. D. Weymouth & M. S. Triantafyllou
- 175 A full, self-consistent treatment of thermal wind balance on oblate fluid planets
E. Galanti, Y. Kaspi & E. Tziperman
- 196 Reynolds-number dependence of the near-wall flow over irregular rough surfaces
A. Busse, M. Thakkar & N. D. Sandham
- S 225 A nonlinear small-deformation theory for transient droplet electrohydrodynamics
D. Das & D. Saintillan
- 254 Statistical steady state in turbulent droplet condensation
C. Siewert, J. Bec & G. Krstulovic
- 281 Capillary jet breakup by noise amplification
S. Le Dizès & E. Villermaux
- 307 An extended Landau-Levich model for the dragging of a thin liquid film with a propagating surface acoustic wave
M. Morozov & O. Manor
- 323 Large-scale motions in turbulent boundary layers subjected to adverse pressure gradients
J. H. Lee
- 362 Nonlinear effects in buoyancy-driven variable-density turbulence
P. Rao, C. P. Caulfield & J. D. Gibbon
- 378 Acoustic streaming and the induced forces between two spheres
D. Fabre, J. Jalal, J. S. Leontini & R. Manasseh
- S 392 Stability of stratified downslope flows with an overlying stagnant isolating layer
A. Jagannathan, K. B. Winters & L. Armi
- 412 Three-dimensional rotating Couette flow via the generalised quasilinear approximation
S. M. Tobias & J. B. Marston
- 429 Enhanced ablation of a vertical ice wall due to an external freshwater plume
C. D. McConnochie & R. C. Kerr
- 448 The generation of gravity-capillary solitary waves by a pressure source moving at a trans-critical speed
N. Masnadi & J. H. Duncan
- 475 Inertio-gravity waves under the non-traditional f -plane approximation: singularity in the large-scale limit
J.-I. Yano
