JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800026696 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimentaland theoretical research papers on plasma physics and its applications.

EDITOR
DR J. P. DOUGHERTY
Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS
PROF. D. BERSHADER
Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *USA*

DR E. INFELD
Institute of Nuclear Research, Hoza 69, *PL*-00-681, *Warsaw, Poland*

PROF. F. D. KAHN
*Department of Astronomy, University of Manchester, Manchester M*13 9*PL, England*

PROF. P. K. KAW
Institute for Plasma Research, Bhat, Gandhinagar 382 424, *India*

PROF. W. B. THOMPSON
Department of Physics, University of California, La Jolla, California 92093, *USA*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paperin the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/88 $5.00 + .00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, NY 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 39 and 40 (1988) is £95.00 net per volume (US $213.00 in the USA and Canada) for institutions; £46.50 (US $160.00) per volume for individuals. Single parts cost £33.00 each (US $75.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, and Canada to *Journal of Plasma Physics*, Cambridge University Press, 510 North Avenue, New Rochelle, NY 10801.

CONTENTS TO VOLUME 39

PART 1 FEBRUARY 1988

Nonlinear stage of the modulational instability of a whistler wave. Part 2. V. I. KARPMAN and A. G. SHAGALOV 1

Effect of ballooning instability on tokamak confinement. G. FU and J. W. VAN DAM 11

Hydrodynamic analogy of nonlinear plasma flows. S. V. BAZDENKOV and O. P. POGUTSE 27

Thermodynamic derivation of Saha's equation for a multi-temperature plasma. A. MORRO and M. ROMEO 41

Field-driven ion migration against dead-stop collisional braking. J. A. GRZESIK 53

Relativistic theory of absorption and emission of electron cyclotron waves in anisotropic plasmas. A. OREFICE 61

Ion-acoustic solitons in multi-component plasmas including negative ions at critical densities. F. VERHEEST 71

Hamiltonian theory of the generalized oscillation-centre transformation. B. WEYSSOW and R. BALESCU 81

Electrostatic Rossby-type ion plasma waves. J. F. MCKENZIE and M. K. DOUGHERTY 103

Electron thermal transport in laser-target plasmas on the basis of Grad's 13-moment transport equations. T. J. M. BOYD, R. D. LONSDALE and J. J. SANDERSON 115

Mean-field magnetohydrodynamics associated with random Alfvén waves in a plasma with weak magnetic diffusion. H. HAMABATA and T. NAMIKAWA 139

Effects of parallel ion dynamics on drift-Alfvén vortices in plasmas. P. K. SHUKLA 151

Resistively induced plasma diffusion due to the trivial marginal modes of ideal MHD. W. LIEBERT and E. REBHAN 157

Nonlinear excitation of convective cell by drift wave and spectrum cascade process in finite ion temperature plasma. D. MAJUMDAR 169

PART 2 APRIL 1988

Editorial notice. J. P. DOUGHERTY 181

Solitons in an ion-beam plasma. G. P. ZANK and J. F. MCKENZIE 183

https://doi.org/10.1017/S0022377800026696 Published online by Cambridge University Press

Properties of waves in an ion-beam plasma system. G. P. Zank and J. F. McKenzie 193

Nonlinear interactions of two compressional hydromagnetic waves. B. Ghosh and K. P. Das 215

Electron cyclotron masing and the force due to net stimulated bremsstrahlung in an electron cyclotron maser using a dilute non-relativistic electron beam. S. H. Kim 229

Models of laser-plasma ablation. Part 3. Steady-state theory: deflagration flow. G. J. Pert 241

Three-wave coupling coefficients for MHD plasmas. G. Brodin and L. Stenflo 277

Time evolution of the velocity distribution of neutral-beam injected ions heated by ICRH in a two-component plasma. D. Anderson, L.-G. Eriksson and M. Lisak 285

Nonlinear dispersion relation for nonlinear Schrödinger equation. J. C. Bhakta 297

The generalized Balescu–Lenard collision operator. H. E. Mynick 303

Full-wave calculations of the O–X mode conversion process. F. R. Hansen, J. P. Lynov, C. Maroli and V. Petrillo 319

Turbulent magnetohydrodynamic density fluctuations. J. V. Shebalin and D. Montgomery 339

PART 3 JUNE 1988

The interaction of high-frequency and low-frequency waves in magnetized plasmas. I. V. Relke and A. M. Rubenchik 369

Near-magnetosonic envelope upper-hybrid waves. N. N. Rao 385

Excitation of whistlers and quasi-static modes by an annular electron beam in a plasma cylinder. I. Talukdar and V. K. Jain 407

New stationary vortex solutions of the Hasegawa–Mima equation. J. Nycander 413

Electron cyclotron absorption for oblique propagation in loss-cone plasmas. L. F. Ziebell 431

Anomalous transport and anomalous heating due to lower-hybrid wave fields. M. Krämer, N. Sollich and J. Dietrich 447

Thermodynamic properties and waves in a dipole plasma. S. Mulugeta and V. N. Malnev 475

https://doi.org/10.1017/S0022377800026696 Published online by Cambridge University Press

Analytical solutions for oblique wave growth from a ring-beam distribution. R. M. THORNE and D. SUMMERS 485

Low-frequency flute modes in a magnetic quadrupole. J. E. WILLETT and H.-S. WU 503

Renormalization-group theory for Alfvén-wave turbulence. Y. ZHOU and G. VAHALA 511

On the application of the ideal magnetohydrodynamic linear eigenvalue equation to the Z-pinch. S. KANELLOPOULOS, M. COPPINS and M. H. HAINES 521

The time-asymptotic stability of shocks in cosmic-ray hydrodynamics. G. P. ZANK 539

AUTHOR INDEX TO VOLUME 39 549
