Substantially revised and up-dated with addi-
tional colour illustrations, 7500 new distribution
map records and a description of a species new to
the British Isles.

The State of India's Environment 1982: a Citizen's Report

Edited by Anil Agarwal, Ravi Chopra and
Kalpana Sherma
Centre for Science and Environment, 807 Vishal
Bhawan, 95 Nehru Place, New Delhi-110019.
This book, the product of a range of voluntary
organisations and individuals, reflects the grow-
ing public awareness of the environmental crisis
engulfing India. It has chapters on Land, Water,
Forests, Dams, Atmosphere, Habitat, People,
Health, Energy, Wildlife and Government. The
UN Environment Programme called it 'a model
for other countries to follow'. Thoroughly
recommended.

IUCN Publications

(No price given but further information from
