THE JOURNAL OF AGRICULTURAL SCIENCE

EDITED FOR THE PLANT BREEDING AND ANIMAL NUTRITION RESEARCH INSTITUTES AT CAMBRIDGE,
AND THE ROTHAMSTED RESEARCH INSTITUTES BY

PROFESSOR SIR R. H. BIFFEN, M.A., F.R.S., School of Agriculture, Cambridge
E. M. CROWTHER, D.Sc., F.I.C., Rothamsted Experimental Station,
Harpenden

SIR A. D. HALL, K.C.B., M.A., LL.D., F.R.S., John Innes Horticultural
Institution, Merton Park, London, S.W. 19

H. HUNTER, M.A., D.Sc., School of Agriculture, Cambridge

B. A. KEEN, D.Sc., F.R.S., Rothamsted Experimental Station, Harpenden

F. H. A. MARSHALL, C.B.E., Sc.D., M.A., F.R.S., School of Agriculture,
Cambridge

SIR E. J. RUSSELL, D.Sc., F.R.S., Rothamsted Experimental Station, Harpenden

IN CONSULTATION WITH

B. C. ASTON, F.I.C., Department of Agriculture, Wellington, New Zealand

PROFESSOR B. T. P. BARKER, M.A., Agricultural and Horticultural Research Station, Long
Ashton, Bristol

DR I. B. POLE-EVANS, C.M.G., Department of Agriculture, Pretoria, South Africa

PROFESSOR J. HENDRICK, B.Sc., F.I.C., Marischal College, Aberdeen

SIR T. H. MIDDLETON, K.C.I.E., K.B.E., C.B., M.A., The Development Commission, London

DR A. E. V. RICHARDSON, Waite Agricultural Research Institute, Glen Osmond, South Australia

DR FRANK T. SHUTT, F.I.C., Experimental Farms, Ottawa, Canada

DR H. J. WHEELER, American Agricultural Chemical Co., Agricultural Service Bureau, 419
Fourth Avenue, New York, U.S.A.

VOLUME XXVII 1937

CAMBRIDGE
AT THE UNIVERSITY PRESS
1937

PRINTED IN GREAT BRITAIN

CONTENTS

PART 1 (JANUARY 1937)

	PAGE
WATSON, S. J. and FERGUSON, W. S. The chemical composition of grass silage. (With three text-figures) . . .	1
DILLON WESTON, W. A. R., HANLEY, F. and BOOER, J. R. Seed disinfection. II. Large-scale field trials on the disinfection of seed corn with mercury dust disinfectants . . .	43
BRETT, C. C., DILLON WESTON, W. A. R. and BOOER, J. R. Soil disinfection. III. Experiments on the germination of peas. Seed protection by the use of disinfectant dusts containing mercury. (With Plate I)	53
WATSON, S. J. and FERGUSON, W. S. The losses of dry matter and digestible nutrients in low-temperature silage, with and without added molasses or mineral acids . . .	67
MANN, HAROLD H. The character of barley grown on soil made acid with sulphate of ammonia. (With Plate II) . . .	108
BEATER, B. E. Improved technique in grading of coarse and fine sands during mechanical analysis of soils. (With one text-figure)	123
HALNAN, E. T. Digestibility trials with poultry. VII. The digestibility of wheat offals, with a note on the apparent discrepancy between the digestibility coefficients and nutritive values of these products	126
HALNAN, E. T. Digestibility trials with poultry. VIII. The digestibility of dried molassed sugar-beet pulp . . .	137
ANDERSON, JAMES. Artificial insemination of sheep. I. Preliminary investigation and its application to sheep in Kenya	143

PART 2 (APRIL 1937)

DAVIES, W. MORLEY, BOTHAM, G. H. and THOMPSON, W. B. Grass silage. A comparison of the changes involved in the ordinary, molasses and A.I.V. processes	151
DUTHIE, D. W. Studies in tropical soils. IV. Organic transformations in soils, composts and peat	162

	PAGE
COPEMAN, P. R. v. D. R. and DILLMAN, F. J. Changes in the composition of guano during storage. (With two text-figures)	178
HENDRICKS, WALTER A. A note on the method of "differential regression" in analysis of variance	188
WOODMAN, H. E., EVANS, R. E. and EDEN, A. Sheep nutrition. I. Measurements of the appetites of sheep on typical winter rations, together with a critical study of the sheep-feeding standards	191
WOODMAN, H. E., EVANS, R. E. and EDEN, A. Sheep nutrition. II. Determinations of the amounts of grass consumed by sheep on pasturage of varying quality	212
WATSON, S. J., FERGUSON, A. S. and HORTON, E. A. The time of cutting hay, and the losses entailed during hay-making	224
WILLIAMS, RICE. The solubility of soil phosphorus and other phosphorus compounds in sodium hydroxide solutions	259
ALLEN, L. A., HARRISON, J., WATSON, S. J. and FERGUSON, W. S. A study of the chemical and bacteriological changes occurring in grass silage. (With four text-figures)	271
ALLEN, L. A., WATSON, S. J. and FERGUSON, W. S. The effect of the addition of various materials and bacterial cultures to grass silage at the time of making on the subsequent bacterial and chemical changes	294
CRUICKSHANK, E. M. A note on the effect of different cereals in the fattening ration on the composition of the body fat of the fowl	309

PART 3 (JULY 1937)

DEIGHTON, THOMAS. A study of the fasting metabolism of various breeds of hog. III. Metabolism and surface area measurements. (With four text-figures)	317
VIRTANEN, ARTTURI ILMARI, VON HAUSEN, SYNNOVE and LAINE, TAUNO. Investigations on the root nodule bacteria of leguminous plants. XIX. Influence of various factors on the excretion of nitrogenous compounds from the nodules. (With Plate III and one text-figure)	332

Contents

vii

	PAGE
PIZER, N. H. Investigations into the environment and nutrition of the cultivated mushroom <i>Psalliota campestris</i> . I. Some properties of composts in relation to the growth of the mycelium. (With Plate IV)	349
BELL, G. D. H. The effect of low-temperature grain pre-treatment on the development, yield and grain of some varieties of wheat and barley	377
HAMMOND, JOHN and MURRAY, G. N. The body proportions of different breeds of bacon pigs. (With Plates V, VI and seven text-figures)	394
CULPIN, C. Studies on the relation between cultivation implements, soil structure and the crop. III. Rolls: an account of methods employed in a study of their actions on the soil. (With two text-figures)	432
GARNER, F. H. and SANDERS, H. G. On the spring cultivation of autumn-sown wheat	447
MOON, F. E. and THOMAS, BRYNMOR. The digestion of huskless oats by poultry	458
WOODMAN, H. E. and EVANS, R. E. The composition and digestibility, when fed to pigs, of three grades of meat meal of widely differing fat content	465
WATSON, D. J. The estimation of leaf area in field crops. (With one text-figure)	474

PART 4 (OCTOBER 1937)

BUCHANAN SMITH, A. D. and DONALD, H. P. Weaning weight of pigs and litter sampling with reference to litter size. (With one text-figure)	485
NOWOTNÓWNA, ANNA. An investigation of nitrogen uptake in mixed crops not receiving nitrogenous manure. (With Plate VII)	503
HEATH, O. V. S. A study in soil cultivation. The effects of varying soil consolidation on growth and development of rain-grown cotton. (With four text-figures)	511

	PAGE
SCOTT BLAIR, G. W. Compressibility curves as a quantitative measure of soil tilth. (With Plates VIII and IX and four text-figures)	541
MITCHELL, R. L. Base exchange equilibria in soil profiles	557
WOODMAN, H. E., EVANS, R. E. and TURPITT, W. G. The nutrition of the bacon pig. II. The influence of high-protein intake on protein and mineral metabolism	569
VIRTANEN, ARTTURI ILMARI, VON HAUSEN, SYNNÖVE and LAINE, TAUNO. Investigations on the root nodule bacteria of leguminous plants. XX. Excretion of nitrogen in associated cultures of legumes and non-legumes. (With Plate X and six text-figures)	584
MENZIES, KITCHIN, A. W. Fertility, morality, and growth rate in pigs. (With three graphs)	611
VARTIOVAARA, UNTO. Investigations on the root-nodule bacteria of leguminous plants. XXI. The growth of the root-nodule organisms and inoculated peas at low temperatures	626
GARNER, F. H. and SANDERS, H. G. The water consumption of suckling sows	638
