ANNUAL REVIEWS

The Essential Resource for Chemical and Biomolecular Engineers

Annual Reviews offers comprehensive, timely collections of critical, topical reviews written by acknowledged experts. Annual Reviews journals examine 40 focused disciplines within the Biomedical, Life, Physical, and Social Sciences. Our Editorial Committees are specialists in selecting and synthesizing literature into concise, insightful review articles. As a result, Annual Reviews journals are among the most highly cited in scientific literature and are consistently ranked within the top ten of journals for their disciplines as indexed by the ISI® Journal Citation Reports (JCR®).

Annual Review of Chemical and Biomolecular Engineering

Vol. 1 • July 2010 • Online & In Print • http://chemeng.annualreviews.org

Editor: John M. Prausnitz, *University of California, Berkeley*

The *Annual Review of Chemical and Biomolecular Engineering* will provide a perspective on the broad field of chemical (and related) engineering. It will address advances in applied chemistry and biology, with a focus on concepts, old and new materials, and/or processes. The series will draw from disciplines as diverse as biology, physics, and engineering, with development of chemical products and processes as the unifying theme.

This journal is of direct interest to those with a general background in the natural sciences as well as for a broad range of scientists concerned with the physical, chemical, and biological properties of materials encountered in the contemporary and future chemical industries.

Access this and all Annual Reviews journals via your institution's subscription at www.annualreviews.org

Personal copies available at a reduced rate. Institutional site license options available. Contact Annual Reviews for details.

654

ISSN 0022-1120

Journal of Fluid Mechanics

10 July 2010

1 Coherent structures and chaotic advection in three dimensions
S. Wiggins

5 Formation of coherent structures by fluid inertia in three-dimensional laminar flows
Z. Pouransari, M. F. M. Speetjens & H. J. H. Clercx

35 Balanced and unbalanced routes to dissipation in an equilibrated Eady flow
M. J. Molemaker, J. C. McWilliams & X. Capet

65 Nonlinear dynamics and synthetic-jet-based control of a canonical separated flow
R. B. Kotapati, R. Mittal, O. Marxen, F. Ham, D. You & L. N. Cattafesta III

99 The influence of initial conditions on turbulent mixing due to Richtmyer–Meshkov instability
B. Thornber, D. Drikakis, D. L. Youngs & R. J. R. Williams

141 Modulation equations for strongly nonlinear oscillations of an incompressible viscous drop
W. R. Smith

161 Sound generation by turbulent boundary-layer flow over small steps
M. Ji & M. Wang

S 195 Shock wave interaction with convex circular cylindrical surfaces
B. W. Skews & H. Kleine

S 207 Modulational instability of Rossby and drift waves and generation of zonal jets
C. P. Connaughton, B. T. Nadiga, S. V. Nazarenko & B. E. Quinn

233 Multi-scale geometric analysis of Lagrangian structures in isotropic turbulence
Y. Yang, D. I. Pullin & I. Bermejo-Moreno

271 Experimental verification of an Oseen flow slender body theory
E. Chadwick, H. M. Khan, M. Moatamedi, M. Mappin & M. Penney

281 Fully nonlinear higher-order model equations for long internal waves in a two-fluid system
S. Debsarma, K. P. Das & J. T. Kirby

305 Turbulent hydraulic jumps in a stratified shear flow
S. A. Thorpe

351 Extension of the Prandtl–Batchelor theorem to three-dimensional flows slowly varying in one direction
M. Sandoval & S. Chernyshenko

363 Experimental and numerical study of the wave run-up along a vertical plate
B. Molin, O. Kimmoun, Y. Liu, F. Remy & H. B. Bingham

387 DNS of the thermal effects of laser energy deposition in isotropic turbulence
S. Ghosh & K. Mahesh

417 On the diffusion of circular domains on a spherical vesicle
S. Aliaskarisohi, P. Tierno, P. Dhar, Z. Khattari, M. Blaszczynski & Th. M. Fischer

453 Stroke-averaged lift forces due to vortex rings and their mutual interactions for a flapping flight model
X. X. Wang & Z. N. Wu

473 Homogeneity of turbulence generated by static-grid structures
Ö. Ertunç, N. Özyilmaz, H. Lienhart, F. Durst & K. Beronov

501 Vortex-induced chaotic mixing in wavy channels
W.-K. Lee, P. H. Taylor, A. G. L. Borthwick & S. Chuenkhum
