Quadratic systems with a degenerate critical point W. A. Coppel	1
On the integral cohomology of the seven-connective cover of BO Tze Beng Ng	11
Quasi-additive solutions of nonlinear differential equations II A. S. Jones	19
Characterising complete Boolean algebras in terms of pure essentialness Kiran R. Bhutani	23
On the structure of real crossed group algebra K. Buzasi	31
Stability and J -depth expansions Jean-Camille Birget	41
Weak compactness in spaces of vector valued measures F. G. J. Wild	55
A diophantine inequality with prime variables S. Srinivasan	57
The limiting behaviour of certain sequences of continued fractions David Angell	67
A note on annihilator Banach algebras Pak-Ken Wong	77
A convergence property of Dubins' representation of distributions Shey Shiung Sheu	83
Approximation by Fourier Stieltjes series S. M. Mazhar	87
Rings isomorphic to their unbounded left ideals Shalom Feigelstock	93
The uniform structure of boundedly compact spaces M. D. Potter	95
A geometrically aberrant Banach space with uniformly normal structure Xin Tai Yu	99
Topologies on locally compact groups Joan Cleary and Sidney A. Morris	105
Asymptotic stability of systems with impulses by the direct method of Lyapunov G. K. Kulev and D. D. Bainov	113
Unimodal expanding maps of the interval Bau-Sen Du	125
On Newton's method and nondiscrete mathematical induction Ioannis K. Argyros	131
Finite coverings by 2-Engel groups Luise-Charlotte Kappe	141
ABSTRACTS OF Ph.D. THESES	
A new collocation-type method for the numerical solution of Hammerstein equations Sunil Kumar	151
Two-dimensional diffusion in irrotational convection Allan Paull	153
Computational approaches to the theory of finite soluble groups Stephen P. Glasby	157
Constructive enumeration of graphs Gordon F. Royle	159

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned. Note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification. (1985 Revision).

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
