- Bakas, N. A.** Mechanisms underlying transient growth of planar perturbations in unbounded compressible shear flow, 479–507
- Bennetts, L. G. & Squire, V. A.** Wave scattering by multiple rows of circular ice floes, 213–238
- Brethouwer, G.** *See* Marstorp, Brethouwer, Grundestam & Johansson
- Cerbelli, S.** *See* Giona, Cerbelli & Garofalo
- Coleman, G. N., Fedorov, D., Spalart, P. R. & Kim, J.** A numerical study of laterally strained wall-bounded turbulence, 443–478
- Dritschel, D. G.** *See* Reinaud & Dritschel
- Fedorov, D.** *See* Coleman, Fedorov, Spalart & Kim
- Frewer, M.** Proper invariant turbulence modelling within one-point statistics, 37–64
- Frigaard, I. A.** *See* Taghavi, Seon, Martinez & Frigaard
- Garofalo, F.** *See* Giona, Cerbelli & Garofalo
- Giona, M., Cerbelli, S. & Garofalo, F.** Characterization of stationary mixing patterns in a three-dimensional open Stokes flow: spectral properties, localization and mixing regimes, 291–341
- Gramstad, O.** *See* Stiassnie & Gramstad
- Grundestam, O.** *See* Marstorp, Brethouwer, Grundestam & Johansson
- Holzner, M., Lüthi, B., Tsinober, A. & Kinzelbach, W.** Acceleration, pressure and related quantities in the proximity of the turbulent/non-turbulent interface, 153–165
- Huppert, H. E.** *See* Neufeld, Vella & Huppert
- Johansson, A. V.** *See* Marstorp, Brethouwer, Grundestam & Johansson
- Khayat, R. E.** *See* Saffari & Khayat
- Kim, J.** *See* Coleman, Fedorov, Spalart & Kim
- Kinzelbach, W.** *See* Holzner, Lüthi, Tsinober & Kinzelbach
- Lagrange, R.** *See* Lambelin, Nadal, Lagrange & Sarthou
- Lambelin, J.-P., Nadal, F., Lagrange, R. & Sarthou, A.** Non-resonant viscous theory for the stability of a fluid-filled gyroscope, 167–194
- Lee, J.-H. & Sung, H. J.** Structures in turbulent boundary layers subjected to adverse pressure gradients, 101–131
- Lei, C.** *See* Xu, Patterson & Lei
- Lüthi, B.** *See* Holzner, Lüthi, Tsinober & Kinzelbach
- Manna, M. & Vacca, A.** Torque reduction in Taylor–Couette flows subject to an axial pressure gradient, 373–401
- Marstorp, L., Brethouwer, G., Grundestam, O. & Johansson, A. V.** Explicit algebraic subgrid stress models with application to rotating channel flow, 403–432
- Martinez, D. M.** *See* Taghavi, Seon, Martinez & Frigaard
- Mathur, M.** Internal wave beam propagation in non-uniform stratifications, 133–152
- Nadal, F.** *See* Lambelin, Nadal, Lagrange & Sarthou
- Neufeld, J. A., Vella, D. & Huppert, H. E.** The effect of a fissure on storage in a porous medium, 239–259
- Patterson, J. C.** *See* Xu, Patterson & Lei
- Peacock, T.** *See* Mathur & Peacock

- Reinaud, J. N. & Dritschel, D. G.** Destructive interactions between two counter-rotating quasi-geostrophic vortices, 195–211
- Saffari, A. & Khayat, R. E.** Flow of viscoelastic jet with moderate inertia near channel exit, 65–100
- Sarthou, A.** *See* Lambelin, Nadal, Lagrange & Sarthou
- Seon, T.** *See* Taghavi, Seon, Martinez & Frigaard
- Shu, C.-W.** *See* Zhang, Zhang & Shu
- Spalart, P. R.** *See* Coleman, Fedorov, Spalart & Kim
- Squire, V. A.** *See* Bennetts & Squire
- Stiassnie, M. & Gramstad, O.** On Zakharov's kernel and the interaction of non-collinear wavetrains in finite water depth, 433–442
- Sung, H. J.** *See* Lee & Sung
- Taghavi, S. M., Seon, T., Martinez, D. M. & Frigaard, I. A.** Buoyancy-dominated displacement flows in near-horizontal channels: the viscous limit, 1–35
- Tsinober, A.** *See* Holzner, Lüthi, Tsinober & Kinzelbach
- Vacca, A.** *See* Manna & Vacca
- Vella, D.** *See* Neufeld, Vella & Huppert
- Xu, F., Patterson, J. C. & Lei, C.** Transient natural convection flows around a thin fin on the sidewall of a differentially heated cavity, 261–290
- Zhang, H.** *See* Zhang, Zhang & Shu
- Zhang, S., Zhang, H. & Shu, C.-W.** Topological structure of shock induced vortex breakdown, 343–372

CAMBRIDGE

# MULTIMEDIA FLUID MECHANICS

G. M. Homsy et al.

*Praise for the First Edition:*

"Homsy and his colleagues have now provided us with a new and powerful teaching aid...This CD is an ambitious project, and, in my view, it has been accomplished with remarkable success...I have no doubt that this CD-ROM should be regarded as a 'set text' for viscous fluid mechanics courses at the undergraduate or starting graduate levels."

—*Journal of Fluid Mechanics*

*Praise for the First Edition:*

"It is impossible to do justice in a short review to the range of video clips available...A student could learn a lot from browsing through the material on his or her own PC... Overall I liked the CD very much indeed, and at the price it represents excellent value. It should be snapped up immediately by university lecturers, students and school Physics departments."

—*Mathematical Gazette*

"A significant upgrade from the earlier versions."

—*AIAA Journal*

2nd  
Edition!

\$24.99: DVD ROM: 978-0-521-72169-1

425 YEARS OF CAMBRIDGE  
PRINTING AND PUBLISHING

- 1 Buoyancy-dominated displacement flows in near-horizontal channels: the viscous limit  
**S. M. Taghavi, T. Seon, D. M. Martinez & I. A. Frigaard**
- 37 Proper invariant turbulence modelling within one-point statistics  
**M. Frewer**
- 65 Flow of viscoelastic jet with moderate inertia near channel exit  
**A. Saffari & R. E. Khayat**
- 101 Structures in turbulent boundary layers subjected to adverse pressure gradients  
**J.-H. Lee & H. J. Sung**
- 133 Internal wave beam propagation in non-uniform stratifications  
**M. Mathur & T. Peacock**
- 153 Acceleration, pressure and related quantities in the proximity of the turbulent/non-turbulent interface  
**M. Holzner, B. Lüthi, A. Tsinober & W. Kinzelbach**
- 167 Non-resonant viscous theory for the stability of a fluid-filled gyroscope  
**J.-P. Lambelin, F. Nadal, R. Lagrange & A. Sarthou**
- 195 Destructive interactions between two counter-rotating quasi-geostrophic vortices  
**J. N. Reinaud & D. G. Dritschel**
- 213 Wave scattering by multiple rows of circular ice floes  
**L. G. Bennetts & V. A. Squire**
- 239 The effect of a fissure on storage in a porous medium  
**J. A. Neufeld, D. Vella & H. E. Huppert**
- 261 Transient natural convection flows around a thin fin on the sidewall of a differentially heated cavity  
**F. Xu, J. C. Patterson & C. Lei**
- 291 Characterization of stationary mixing patterns in a three-dimensional open Stokes flow: spectral properties, localization and mixing regimes  
**M. Giona, S. Cerbelli & F. Garofalo**
- 343 Topological structure of shock induced vortex breakdown  
**S. Zhang, H. Zhang & C.-W. Shu**
- 373 Torque reduction in Taylor–Couette flows subject to an axial pressure gradient  
**M. Manna & A. Vacca**
- 403 Explicit algebraic subgrid stress models with application to rotating channel flow  
**L. Marstorp, G. Brethouwer, O. Grundestam & A. V. Johansson**
- 433 On Zakharov’s kernel and the interaction of non-collinear wavetrains in finite water depth  
**M. Stiassnie & O. Gramstad**
- 443 A numerical study of laterally strained wall-bounded turbulence  
**G. N. Coleman, D. Fedorov, P. R. Spalart & J. Kim**
- 479 Mechanisms underlying transient growth of planar perturbations in unbounded compressible shear flow  
**N. A. Bakas**
- 508 INDEX TO VOLUME 639
