

QUATERNARY RESEARCH

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its nearly 50-year history in advancing the understanding of earth and human history through interdisciplinary study of the last 2.7 million years. Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Submit manuscripts online at <http://editorialmanager.com/qr>. See instructions for submitting your manuscripts at <https://www.cambridge.org/core/journals/quaternary-research/information/guide-for-authors>.

Subscription Information: *Quaternary Research* published two volumes per year with three issues each. The journal is published on behalf of Quaternary Research Center by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA. Annual subscription rates for Volumes 89 and 90 (2018): Institutional rate, print only: \$1,312.00 (£795.00 + VAT). Institutional rate, online only: \$1,287.00 (£780.00 + VAT). Institutional rate, print and online: \$1,365.00 (£827.00 + VAT). For subscriptions, renewals, and address changes, please visit <https://www.cambridge.org/core/journals/quaternary-research/subscribe>. Email subscriptions_newyork@cambridge.org if you are in the Americas or journals@cambridge.org for the rest of the world.

CONTENTS

SPECIAL ISSUE: INQUA LOESSFEST 2016

REVIEW ARTICLE

- 563–618 Approaches and challenges to the study of loess—Introduction to the LoessFest Special Issue**
Randall J. Schaetzl, E. Arthur Bettis III, Omn Crowi, Kathryn E. Fitzsimmons, David A. Grimley, Ulrich Hambach, Frank Lehmkuhl, Slobodan B. Marković, Joseph A. Mason, Piotr Owczarek, Helen M. Roberts, Denis-Didier Rousseau, Thomas Stevens, Jef Vandenberghe, Marcelo Zárate, Daniel Veres, Shiling Yang, Michael Zech, Jessica L. Conroy, Aditi K. Dave, Dominik Faust, Qingzhen Hao, Igor Obrecht, Charlotte Prud'homme, Ian Smalley, Alfonsina Tripaldi, Christian Zee den, and Roland Zech

RESEARCH ARTICLES

- 619–628 Mineral magnetic record of the Miocene-Pliocene climate transition on the Chinese Loess Plateau, North China**
Hong Ao, Mark J. Dekkers, Andrew P. Roberts, Eelco J. Rohling, Zhisheng An, Xiaodong Liu, Zhaoxia Jiang, Xiaoke Qiang, Yong Xu, and Hong Chang
- 629–644 Magnetostratigraphic dating of the Linyi Fauna and implications for sequencing the mammalian faunas on the Chinese Loess Plateau**
Yahui Qiu, Hong Ao, Yunxiang Zhang, Peixian Shu, Yongxiang Li, Xingwen Li, and Peng Zhang
- 645–659 Insights into the provenance of the Chinese Loess Plateau from joint zircon U-Pb and garnet geochemical analysis of last glacial loess**
Kaja Fenn, Thomas Stevens, Anna Bird, Mara Limonta, Martin Rüttner, Pieter Vermeesch, Sergio Andò, Eduardo Garzanti, Huayu Lu, Hanzhi Zhang, and Zeng Lin
- 660–673 Evaluating the paleoclimatic significance of clay mineral records from a late Pleistocene loess-paleosol section of the Ili Basin, Central Asia**
Yue Li, Yougui Song, Mengxiu Zeng, Weiwei Lin, Rustam Orozbaev, Liangqing Cheng, Xinli Chen, and Tilixvaldi Halmurat
- 674–690 Reevaluation of Late Pleistocene loess profiles at Remizovka (Kazakhstan) indicates the significance of topography in evaluating terrestrial paleoclimate records**
Tobias Sprafke, Kathryn E. Fitzsimmons, Christoph Grützn er, Austin Elliot, Laurent Marquer, and Saida Nigmatova
- 691–701 Relationships between loess and the Silk Road reflected by environmental change and its implications for human societies in the area of ancient Panjikent, central Asia**
Piotr Owczarek, Magdalena Opala-Owczarek, Oimahmad Rahmonov, Abdurauf Razzokov, Zdzisław Jary, and Tadeusz Niedźwiedź
- 702–717 Aeolian silt contribution to soils on mountain slopes (Mt. Ślęza, southwest Poland)**
Jarosław Waroszewski, Tobias Sprafke, Cezary Kabala, Elżbieta Muszyfaga, Beata Łabaz, and Przemysław Woźniczka
- 718–738 Late Quaternary loess and soils on uplands in the Canyonlands and Mesa Verde areas, Utah and Colorado**
Marith C. Reheis, Harland L. Goldstein, Richard L. Reynolds, Steven L. Forman, Shannon A. Mahan, and Paul E. Carrara
- 739–755 Episodic deposition of Illinois Valley Peoria silt in association with Lake Michigan Lobe fluctuations during the last glacial maximum**
Thomas A. Nash, Jessica L. Conroy, David A. Grimley, William R. Guenther, and Ben Brandon Curry
- 756–768 Mineralogical and geochemical evidence of weathering in a middle to late Pleistocene paleosol sequence in the Driftless Area of Wisconsin**
Peter M. Jacobs and Anthony T. Davis
- 769–785 Eolian sand and loess deposits indicate west-northwest paleowinds during the Late Pleistocene in western Wisconsin, USA**
Randall J. Schaetzl, Phillip H. Larson, Douglas J. Faulkner, Garry L. Running, Harry M. Jol, and Tammy M. Rittenour
- 786–796 Loess in the mid-Atlantic region, USA**
John S. Wah, Daniel P. Wagner, and Darrin L. Lowery
- 797–819 Origin of last-glacial loess in the western Yukon-Tanana Upland, central Alaska, USA**
Daniel R. Muhs, Jeffrey S. Pigati, James R. Budahn, Gary L. Skipp, E. Arthur Bettis III, and Britta Jensen
- 820–820 Aeolian silt contribution to soils on mountain slopes (Mt. Ślęza, southwest Poland) – ERRATUM**
