[PART II

CONTENTS

NO.	PAGE
VI. Some Basaltic Rocks from West Greenland. By H. I. DREVER and D. F. LIVINGSTONE. (With One Plate and Nine Text-figures)	97
<i>(Issued separately December 18, 1948.)</i>	
VII. Monazite from Bodmin Moor, Cornwall: A Study in Geochronology. Part I. Monazite as a Geological Timekeeper. By ARTHUR HOLMES, D.Sc., F.R.S., University of Edinburgh. Part II. Analysis of Bodmin Moor Monazite for Lead, Thorium and Uranium. By A. A. SMALES, B.Sc., A.R.I.C., Imperial Chemical Industries Limited, Billingham Division, Research Department, Billingham, Co. Durham. (With Two Plates and Three Text-figures)	115
<i>(Issued separately December 18, 1948.)</i>	
VIII. Variation in Shape of Shell with Respect to Ecological Station. A Review dealing with Recent Unionidæ and Certain Species of the Anthracosiidæ in Upper Carboniferous Times. By R. M. C. EAGAR, B.A., Ph.D., F.G.S. <i>Communicated</i> by Professor H. GRAHAM CANNON, F.R.S. (With Nine Text-figures)	130
<i>(Issued separately December 18, 1948.)</i>	
IX. The Fall in the Fertility of Scottish Women during the Period 1875-1939: A Comparison of the Trends in Various Geographical Localities. By R. S. BARCLAY, B.Sc., Ph.D., and W. O. KERMACK, M.A., D.Sc., LL.D., F.R.S. (With Six Text-figures)	149
<i>(Issued separately December 18, 1948.)</i>	
X. An Apparatus for Following the Course of Gaseous Exchange by Living Tissue. By G. F. ASPREY, B.Sc., Ph.D., Department of Botany, University of Aberdeen. <i>Communicated</i> by Professor J. WALTON, M.A., D.Sc. (With Seven Text-figures)	163
<i>(Issued separately December 18, 1948.)</i>

THE PREPARATION FOR PUBLICATION OF PAPERS IN THE TRANSACTIONS AND IN THE PROCEEDINGS (SECTIONS "A" AND "B") OF THE SOCIETY

IN view of the national necessity for exercising the strictest economy in paper and the high cost of publication, authors of papers are requested to write their communications in as concise a form as possible and to avoid excess of tables and illustrations.

An author is advised to retain a copy of his paper, as the Society cannot undertake any responsibility in relation to the custody of papers entrusted to it. The MS. must be easily legible, preferably typewritten on one side of quarto or foolscap paper and with pages numbered. *It must be absolutely in its final form for printing.* A short summary of the important points in the paper should be given. A table of contents (for a long paper), references to plates, etc., must be in their proper places, and positions indicated for the insertion of illustrations that are to appear in the text. Names of genera and species should be in italics. Footnotes, where possible, should be avoided.

Additions to a paper after it has been finally handed in for publication will, if accepted by the Council, be treated and dated as separate communications, and may, or may not, be printed immediately after the original paper.

References to literature should be placed at the end of the paper, alphabetically arranged, under authors' names, with abridged titles of journals, thus:—

SANDEMAN, I., 1929. "The Fulcher Bands of Hydrogen," *Proc. Roy. Soc. Edin.*, XLIX, 48-64.

WHITTAKER, E. T., and ROBINSON, G., 1923. *A Short Course in Interpolation*, London.

Titles of papers should be quoted exactly, and all references to literature should be carefully checked by the authors before submitting the paper. References to literature in the text should be made by quoting the author's name and the year of publication thus (Sandeman, 1929) or (Whittaker and Robinson, 1923), and adding the page when necessary.

All illustrations must be in a form immediately suitable for reproduction, preferably of a size to permit reduction to about two-thirds the linear dimensions of the original, and should be capable of reproduction by photographic processes. Drawings and diagrams to be reproduced as line blocks should be made with fixed Indian ink, preferably on fine white bristol board, free from folds or creases; smooth clean lines or sharp dots, but no washes or colours, should be used. Graphs should be on a squared paper ruled in *faint blue* lines, unless the lines are to be brought out. If the illustrations are on a large scale to be afterwards reduced by photography, any lettering must be on a corresponding scale.
