JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800002920 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California, 94305, USA

PROF. F. D. KAHN

Department of Astronomy, University of Manchester, Manchester M13 9PL, England

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, USA

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C of the per copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/85/2828-0001 $05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, NY 10022.

Three parts form a volume. The subscription price (which includes postage) of volumes 33 and 34 (1985) is £80.00 net per volume (US $197.50 in the USA and Canada) for institutions; £40.00 (US $98.75) per volume for individuals. Single parts cost £28.00 each (US $70.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA and Canada to Cambridge University Press, 32 East 57th Street, New York, NY 10022.

CONTENTS TO VOLUME 34

PART 1 AUGUST 1985

Turbulent disruptions from the Strauss equations. J. P. DAHLBURG, D. MONTGOMERY and W. H. MATTHAEUS *page* 1

VLF emission stimulated by parallel electric fields. B. JUHL and R. A. TREUMANN 47

Hydromagnetic waves for a collisionless plasma in strong magnetic fields. S. DUHAU and A. DE LA TORRE 67

Turbulent diffusion in two-dimensional, strongly magnetized plasmas. H. L. PÉCSELI and T. MIKKELSEN 77

Stimulated scattering of electromagnetic waves by magnetosonic modes in a plasma. L. STENFLO 95

Electromagnetic solitary waves in magnetized plasmas. R. D. HAZELTINE, D. D. HOLM and P. J. MORRISON 103

Beat-wave excitation of plasma waves. J. T. MENDONÇA 115

Time evolution for different geometrical configurations of charged particles in a time-varying magnetic field. S. BOUQUET, L. CAIRO and M. R. FEIX 127

Nonlinear theory of large-mode-number ballooning modes in fully toroidal geometry. J. P. MONDT and J. WEILAND 143

Particle aspect analysis of drift wave in the presence of inhomogeneous magnetic field. M. S. TIWARI, R. P. PANDEY and K. D. MISRA 163

PART 2 OCTOBER 1985

Gyrokinetics of resonant particles in a collisionless plasma. S. P. KARNILOVICH, G. F. MALEK and V. P. MILANTIEV 177

Ion cyclotron electromagnetic wave structure in Elmo bumpy torus. M. COTSAFTIS, N. T. GLADD and N. A. KRALL 191

Whistler-mode polarization in a hot anisotropic plasma. S. S. SAZHIN 213

Alfvén wave heating of a cylindrical plasma using axisymmetric waves. Part 1. MHD theory. I. J. DONNELLY, B. E. CLANCY and N. F. CRAMER 227

Low-frequency modes in a two-species plasma. Y. S. SATYA, K. M. JAIN, S. GUHA and M. BOSE 247

Resistive Alfvén normal modes in a non-uniform plasma. G. EINAUDI and Y. MOK 259

https://doi.org/10.1017/S0022377800002920 Published online by Cambridge University Press

Electron dynamics in one-dimensional double layers. T. YAMAMOTO 271

An average Lagrangian formulation of ponderomotive forces in Vlasov plasmas. G. W. KENTWELL 289

Resistive convection in a cylindrical plasma. Part 2. L. GOMBEROFF 299

The electrostatic eigenmodes of a cold plasma with a two-dimensional density non-uniformity. E. NÄSLUND and O. M. GRADOV 305

Firehose and mirror instabilities in a collisionless heat conducting plasma. G. L. KALRA, B. SINGH and S. N. KATHURIA 313

Resonant interaction of electron cyclotron waves with a plasma containing arbitrarily drifting suprathermal electrons. A. OREFICE 319

Ripple transport at low collision frequency. W. N. G. HITCHON, C. D. BEIDLER, H. E. MYNICK and J. L. SHOHET 327

PART 3 DECEMBER 1985

General two-dimensional magnetohydrodynamic equilibria with mass flow. Y. Z. AGIM and J. A. TATARONIS 337

Low- and medium-energy kinetic theory of a particle-beam generated plasma. N. PEYRAUD 361

Heating kinetic theory of a particle-beam generated plasma. N. PEYRAUD 377

Modified Korteweg–de Vries ion-acoustic solitons in a plasma. Y. NAKAMURA and I. TSUKABAYASHI 401

Dispersion relation for Bernstein waves using a new transformation for the modified Bessel function. M. SATO 417

Three-wave interaction in a cold plasma column. T. LINDGREN, L. STENFLO, N. KOSTOV and I. ZHELYAZKOV 427

On beam-generated electrostatic electron waves in magnetized warm plasma. B. HULTQVIST 435

Lower-hybrid instabilities driven by an ion-velocity-ring. K. AKIMOTO, K. PAPADOPOULOS and D. WINSKE 445

Ion-acoustic instabilities driven by an ion velocity ring. K. AKIMOTO, K. PAPADOPOULOS and D. WINSKE 467

Corrigendum. T. G. FORBES, E. R. PRIEST and A. W. HOOD 481

AUTHOR INDEX TO VOLUME 34 484
