

## Subscription rates

Subscription rates for volume 45 (2008) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$372.00; A\$447.00; £186.00 for libraries and institutions; or US\$124.00; A\$149.00; £62.00 for individuals belonging to a recognised scientific society. The subscription rates for volume 40 (2008) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Papers published in *Journal of Applied Probability (JAP)* may be either: (i) *research papers* not exceeding 20 printed pages; or (ii) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress. *Letters* relating specifically to papers that have appeared in *JAP* will also be published there. *Review papers*, *longer research papers*, *letters to the Editor* and papers in *stochastic geometry and statistical applications* are published in *Advances in Applied Probability*, the companion publication.

It is the policy not to accept for publication papers that cannot appear in print within 15 months of the date of receipt of the final version. In order to meet this deadline, an accepted paper may be published in either journal, according to the space available.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Papers should be written in English or French; papers in other languages may be accepted, but will appear (subject to the author's agreement) in English or French translation.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2000 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript<sup>TM</sup> (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [l.nash@sheffield.ac.uk](mailto:l.nash@sheffield.ac.uk). Authors should also submit one hard copy to the Executive Editor, as above.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/08

Volume 45 Number 2

*Research Papers*

- 293 D. J. DALEY AND D. VERE-JONES. David George Kendall and applied probability
- 297 ALEXANDER L. STOLYAR. Dynamic distributed scheduling in random access networks
- 314 R. BEKKER, O. J. BOXMA AND O. KELLA. Queues with delays in two-state strategies and Lévy input
- 333 HANS DADUNA, CHRISTIAN MALCHIN AND RYSZARD SZEKLI. Weak convergence limits for sojourn times in cyclic queues under heavy traffic conditions
- 347 SAUL C. LEITE AND MARCELO D. FRAGOSO. Diffusion approximation of state-dependent G-networks under heavy traffic
- 363 HANSJÖRG ALBRECHER, JEAN-FRANÇOIS RENAUD AND XIAOWEN ZHOU. A Lévy insurance risk process with tax
- 376 MATTEO ORTISI. Polynomial-rate convergence to the stationary state for the continuum-time limit of the minority game
- 388 HSIAO-CHI CHEN AND YUNSHYONG CHOW. Equilibrium selection in evolutionary games with imperfect monitoring
- 403 YI-CHING YAO AND MAY-RU CHEN. Strong optimality of bold play for discounted Dubins–Savage gambling problems with time-dependent parameters
- 417 QUANXIN ZHU AND TOMÁS PRIETO-RUMEAU. Bias and overtaking optimality for continuous-time jump Markov decision processes in Polish spaces
- 430 TOSHIO NAKATA. A Poisson approximation for an occupancy problem with collisions
- 440 NARISS TOUYAR, SOPHIE SCHBATH, DOMINIQUE CELLIER AND HÉLÈNE DAUCHEL. Poisson approximation for the number of repeats in a stationary Markov chain
- 456 XIAOXIN WANG AND AIHUA XIA. On negative binomial approximation to  $k$ -runs
- 472 DANIEL TOKAREV. Growth of integral transforms and extinction in critical Galton–Watson processes
- 481 DANIELA BERTACCHI AND FABIO ZUCCA. Critical behaviors and critical values of branching random walks on multigraphs
- 498 JOEL C. MILLER. Bounding the size and probability of epidemics on networks
- 513 PETER NEAL. The SIS great circle epidemic model
- 531 A. G. ROSSBERG. Laplace transforms of probability distributions and their inversions are easy on logarithmic scales
- 542 VALDO DURRLEMAN. Convergence of at-the-money implied volatilities to the spot volatility
- 551 E. RAPOO. A variable step size Riemannian sum for an Itô integral

*Short Communications*

- 568 EROL A. PEKÖZ AND SHELDON M. ROSS. Relating time and customer averages for queues using ‘forward’ coupling from the past
- 575 DEVDATT DUBHASHI AND OLLE HÄGGSTRÖM. A note on conditioning and stochastic domination for order statistics
- 580 EHUD LEHRER AND ERAN SHMAYA. Two remarks on Blackwell’s theorem
