

## Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Executive Editor on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at <https://mc.manuscriptcentral.com/apjournals>. All submissions will be acknowledged on receipt.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/19

## Volume 58 Number 4

### *Research Papers*

- 851 XIAO FANG, HAN L. GAN, SUSAN HOLMES, HAIYAN HUANG, EROL PEKÖZ, ADRIAN RÖLLIN AND WENPIN TANG. Arcsine laws for random walks generated from random permutations with applications to genomics
- 868 BORIS BUCHMANN AND KEVIN W. LU. Necessity of weak subordination for some strongly subordinated Lévy processes
- 880 QI-MING HE. Bounds on the mean and squared coefficient of variation of phase-type distributions
- 890 CAIO ALVES, RODRIGO RIBEIRO AND RÉMY SANCHIS. Clustering in preferential attachment random graphs with edge-step
- 909 GERGELY ÓDOR AND PATRICK THIRAN. Sequential metric dimension for random graphs
- 952 FRANÇOIS BACCELLI AND SANKET S. KALAMKAR. On point processes defined by angular conditions on delaunay neighbors in the Poisson–Voronoi tessellation
- 966 JUDITH SCHILLING AND NORBERT HENZE. Two poisson limit theorems for the coupon collector’s problem with group drawings
- 978 MARTIN MÖHLE. A restaurant process with cocktail bar and relations to the three-parameter Mittag–Leffler distribution
- 1007 LANDY RABEHASAINA AND JAE-KYUNG WOO. Multitype branching process with non-homogeneous Poisson and contagious Poisson immigration
- 1043 LAURENT MICLO AND STÉPHANE VILLENEUVE. On the forward algorithm for stopping problems on continuous-time Markov chains
- 1064 YIYING ZHANG. On transform orders for largest claim amounts
- 1086 LARBI ALILI AND DAVID WOODFORD. On the finiteness and tails of perpetuities under a Lamperti–Kiu MAP
- 1114 MARTIN SINGULL, DENISE UWAMARIYA AND XIANGFENG YANG. Large-deviation asymptotics of condition numbers of random matrices
- 1131 FLORIN AVRAM, BIN LI AND SHU LI. General drawdown of general tax model in a time-homogeneous Markov framework
- 1152 RONGFANG YAN, JIANDONG ZHANG AND YIYING ZHANG. Optimal allocation of relevations in coherent systems
