## International Course in Applied Epidemiology

Gina Pugliese, RN, MS  
Martin S. Favero, PhD

The CDC and Emory University will cosponsor a course in applied epidemiology designed for international public health professionals to be held at the CDC on October 5-30, 1998. The course emphasizes the practical application of epidemiol-

ogy to public health problems and comprises lectures, workshops, classroom exercises (including actual epidemiological problems), and computer laboratories. Topics covered include descriptive epidemiology and biostatistics, analytic epidemiology, epidemic investigation, public health surveillance, surveys and sampling, computers and Epi Info software, and discussions of selected prevalent dis-

eases. There is a tuition charge.

Applications must be received by August 31, 1998. Additional information and applications are available from Department PSB, Rollins School of Public Health, Emory University, 7th Floor, 1518 Clifton Rd NE, Atlanta, GA 30322; telephone 404-727-3485; fax 404-727-4590; or e-mail ogostan@sph.emory.edu.
