Bone Anchored Hearing Aid

BAHA Classic 300

The updated BAHA has **three main improvements**:

The first is the development of a **continuous base tone control** which has flexibility to cover the frequency response range of the four previous models.

The second improvement is the adoption of ABS plastic for the hearing aid casing which offers a more **aesthetic moulded design**, greater strength and colour stability.

THE BAHA CLASSIC 300 ALSO COMES WITH A **FIVE YEAR WARRANTY** (UK Only).

Indications for the BAHA

- **Chronic Otitis Media** - with conductive or mixed hearing loss where the use of air conduction devices is contraindicated.
- **Congenital Malformation** - of the external or middle ear where an air conduction hearing aid cannot be used or is contraindicated.
- **Otosclerosis** - in some cases.

AND

KTP/532 LASER WORKSHOP

CME Accredited by BAO-HNS (23 Points)
Approved by European Laser Association (ELA)

Tyrone County Hospital, Omagh, N. Ireland
8th–11th April 1997

A two day course in Functional Endoscopic Sinus Surgery with hands on nose-sinus endoscopy will instruct the participant with an in depth account of both morbid and endoscopic anatomy, pathophysiology, diagnosis including imaging techniques and surgical approach with post operative care. Complications and how to prevent them will be discussed in detail.

The course is aided by profuse illustrations, video presentations and live surgery.

The two day KTP/532 workshop aims to instruct the surgeons both basic concepts and the varied applications in E.N.T. & Head and Neck surgery including tissue interactions of various lasers. The latest techniques with KTP Laser. Tonsillectomy, Functional Endoscopic Sinus Surgery, UP3 and microlaryngeal surgery are discussed by didactic lectures and video presentations.

Live Tonsillectomy surgery will be performed with KTP/532 laser on several patients. The delegates will have 'Hands on' training with KTP/532 laser system with various animal tissues and Pig's larynx with micromanipulator.

The course has limited number of places and these will be allocated on a first come first served basis.

High Rate COMBI 40+

The high-performance
cochlear implant

TWENTY YEARS Experience

For over twenty years MED-EL scientists have developed cochlear implant technology, resulting in the New High Speed COMBI 40+. The COMBI 40+ is a repackaging of the highly reliable COMBI 40 implant system.

UNPARALLELED Service

MED-EL is a European company with six subsidiaries and nine service centres, dedicated to providing excellent local service.

FASTER Processing

The high speed COMBI 40+ marks another significant step towards optimizing cochlear implant technology. With over 18,000 pulses per second, the fast Continuous Interleaved Sampling (CIS) strategy provides superior levels of open-set speech understanding.

- B.T.E. Upgradable
- Accepts Future Strategies
- Miniaturized Implant
- MRI Compatible
