# 11 Seconds Are like Hours When You Need to Access Important Medical Information

**Access hours of information in seconds with  
the Grateful Med software of the NLM**

If you need quick and easy access to the most up-to-date information on health care services, medical research, toxic and chemical substances, cancer, AIDS, or other health care issues, you need GRATEFUL MED. Developed by the *National Library of Medicine*, the world's largest medical library, the GRATEFUL MED software package assists the user in finding the most current literature available through the use of on-line computer databases. All you need is a personal computer (IBM or Macintosh) and an access code from the NLM, and you have immediate access to a vast field of important medical information. Around-the-clock availability ensures that you have this information when you need it.

**Good medicine for your information needs  
For complete medical information around the clock...**

For further information about the NLM's Grateful Med Software Service, just fill out this coupon. Clip and mail to:

# SOME PEOPLE TAKE DRUG ABUSE TO HEART.

Most cocaine users are so dedicated to the drug that what it does to their hearts never enters their minds. They don't realize that every time they use cocaine, they put themselves at risk for such potentially fatal cardiovascular complications as hypertensive crisis... myocarditis...myocardial infarction ...ventricular tachycardia...ventricular fibrillation...even cardiac arrest.

Chances are, at least some of these people are your patients. And many of them may feel more comfort-

able telling a nurse what they can't—or won't—tell a doctor. That's why your role becomes critical in helping suspected drug abusers understand what illegal drug use does to their bodies.

As key members of the health care team, nurses *can* make a difference in helping to curb drug abuse, and in preventing some of its deadliest consequences. The next time you suspect a patient may be using cocaine—or *any*

illegal substance—have a heart-to-heart talk about the damage these drugs can do.

**A short talk  
can go a long way.**
