

## GENERAL INFORMATION

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information>

The CMS publishes two research journals: the Canadian Journal of Mathematics (CJM) for longer papers, and the Canadian Mathematical Bulletin (CMB) for shorter papers. To be submitted to CJM, papers should be at least 18 pages long. Shorter papers should be submitted to the CMB. All submitted papers are considered subject to the understanding that they have not been published and that they are not being considered for publication elsewhere. To be accepted, papers must treat new mathematical research, be well written, and be of interest to a significant segment of the mathematical community. Papers may be written in English or French. Manuscripts must be prepared in accordance with the instructions for authors provided at

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information/information-for-author>

## SUBSCRIPTION INFORMATION

Subscription rates can be found at

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/subscribe>

Members of the CMS are entitled to a reduced subscription rate. For more information, please contact the CMS at [memberships@cms.math.ca](mailto:memberships@cms.math.ca).

### CANADA POSTMASTER

Canadian Mathematical Bulletin  
Publications Mail Registration:

40005057

Send address changes to:

Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006

### CANADIAN MATHEMATICAL BULLETIN

(USPS # 007527) is published 4 times per year, quarterly (March, June, September, December). Published by Cambridge University Press, One Liberty Plaza, New York, NY 10006 on behalf of the Canadian Mathematical Society. US Mailing Agent: Sheridan Press, 450 Fame Ave., Hanover, PA 17331 USA.

Periodicals postage paid at New York, NY and at additional mailing offices.

US POSTMASTER: Send address changes to Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006.

## RENSEIGNEMENTS GÉNÉRAUX

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information>

La SMC publie deux revues de recherche : le Journal canadien de mathématiques (JCM) qui présente des articles longs et le Bulletin canadien de mathématiques (BCM) des articles plus courts. Les articles destinés au JCM doivent compter au moins 18 pages. Les articles plus courts doivent être acheminés au BCM. Il est entendu que les articles présentés pour publication sont inédits et qu'ils ne sont pas à l'étude pour publication dans d'autres revues. Un article accepté porte sur des recherches récentes, est bien rédigé et s'avère susceptible d'intéresser bon nombre de mathématiciens. Nous acceptons les articles rédigés en langues anglaise ou française. Les articles doivent répondre aux conventions énoncés pour les auteurs au

## ABONNEMENTS

Les tarifs d'abonnements sont disponibles en ligne au

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/subscribe>

Les membres de la SMC ont droit à un taux d'abonnements réduits. Pour plus amples renseignements, veuillez contacter la SMC à [adhesions@smc.math.ca](mailto:adhesions@smc.math.ca).

### POSTES CANADIENNES

Bulletin canadien de mathématiques

No. d'enregistrement du courrier publications:  
40005057

Envoyer les changements d'adresses aux :

Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006

### BULLETIN CANADIEN DE MATHÉMATIQUES

(USPS # 007527) est publié 4 fois par an, tous les trimestres (mars, juin, septembre, décembre). Publié par Cambridge University Press, One Liberty Plaza, New York, NY 10006 au nom de la Société mathématique du Canada. Agent de poste US: Sheridan Press, 450 Fame Ave., Hanover, PA 17331 USA.

Postes payé à New York, et autres bureaux de diffusion supplémentaires.

POSTES AMÉRICAINES: Envoyer les changements d'adresses aux Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006.

223	Sharp Bertini Theorem for Plane Curves over Finite Fields	<i>Shamil Asgarli</i>
231	Newton Complementary Duals of $f$ -Ideals	<i>Samuel Budd, Adam Van Tuyl</i>
243	Discrete Multilinear Spherical Averages	<i>Brian Cook</i>
247	Cyclicity in Dirichlet Spaces	<i>Y. Elmadani, I. Labghail</i>
259	A Note About the Strong Maximum Principle on RCD Spaces	<i>Nicola Gigli, Chiara Rigoni</i>
267	Examples of Non-finitely Generated Cox Rings	<i>José Luis González, Kalle Karu</i>
287	Low Complexity Solutions of the Allen–Cahn Equation on Three-spheres	<i>Robert Haslhofer, Mohammad N. Ivaki</i>
293	Monoidal Categories, 2-Traces, and Cyclic Cohomology	<i>Mohammad Hassanzadeh, Masoud Khalkhali, Ilya Shapiro</i>
313	On the Limiting Weak-type Behaviors for Maximal Operators Associated with Power Weighted Measure	<i>Xianming Hou, Huoxiong Wu</i>
327	Commuting and Semi-commuting Monomial-type Toeplitz Operators on Some Weakly Pseudoconvex Domains	<i>Cao Jiang, Xing-Tang Dong, Ze-Hua Zhou</i>
341	Determinant of the Laplacian on Tori of Constant Positive Curvature with one Conical Point	<i>Victor Kalvin, Alexey Kokotov</i>
349	Jordan–Chevalley Decomposition in Lie Algebras	<i>Leandro Cagliero, Fernando Szechtman</i>
355	$\{\sigma, \tau\}$ -Rota–Baxter Operators, Infinitesimal Hom-bialgebras and the Associative (Bi)Hom–Yang–Baxter Equation	<i>Ling Liu, Abdenacer Makhlouf, Claudia Menini, Florin Panaite</i>
373	Spectral Flow Argument Localizing an Odd Index Pairing	<i>Terry A. Loring, Hermann Schulz-Baldes</i>
383	Generating Curves of Minimal Ruled Real Hypersurfaces in a Nonflat Complex Space Form	<i>Sadahiro Maeda, Hiromasa Tanabe, Seiichi Udagawa</i>
393	Vanishing Fourier Transforms and Generalized Differences in $L^2(\mathbb{R})$	<i>Rodney Nillsen</i>
405	Sparse Bounds for a Prototypical Singular Radon Transform	<i>Richard Oberlin</i>
417	The Wedge-of-the-edge Theorem: Edge-of-the-wedge Type Phenomenon Within the Common Real Boundary	<i>J. E. Pascoe</i>
429	Irreducible Polynomials Over a Finite Field with Restricted Coefficients	<i>Sam Porritt</i>
441	Actions of Semitopological Groups	<i>Jan van Mill, Vesko M. Valov</i>
