

superintendents is worthy of being brought under the notice of the members of this Association.

Dr. Christie.—I may say I have had this clock in use, and find it exceedingly efficient and cheap. The clock costs £6 and each box 15s., consequently you can adapt it to any institution you like at a comparatively small cost. I calculate that by introducing this I saved our committee at least £100.

The President.—I have one or two notices about alterations of rules at the next annual meeting—those dreadful rules,—and Dr. Belgrave has further given an additional notice that it be taken into consideration whether more frequent meetings for the perusal and discussion of papers should not be held in London, which notice is seconded by Dr. Rys Williams.

Dr. Maudsley.—I will take the opportunity of adding another motion for next year—a motion for making the President eligible, at the end of his year of office, for re-election, at any rate for another year.

Dr. Tuke.—I have given notice for that this morning. Will you second it?

Dr. Maudsley.—If you have given notice of it, I will second it.

Dr. Christie.—Before separating, I think we are bound to pass a vote of thanks to our President for his conduct in the chair, and for the very able manner in which he has conducted the meeting.

Dr. Maudsley seconded the motion, which was carried unanimously.

Dr. Tuke.—I am sure we shall offer our unanimous thanks to the President and Fellows of the College for their kind permission to meet here to-day, most graciously given to us by Sir Thomas Watson and the Fellows some five years ago, and which has since been continued. I beg to move a vote of thanks to the Fellows and President of the college.

Dr. Langdon Down.—I will second that.

Carried unanimously.

The President.—Nothing has done the Association more good in the opinion of the profession than having the use of this College. It has raised our standing very much, and I am sure we owe the College our grateful thanks for their continued courtesy.

The proceedings then terminated.
