The first of a series of announcements describing electro-surgical technique with Marconi Diathermy equipments as the operative medium.

Transverse Electro-Surgical Incision

- 1 Cutting needle — preferably tungsten or fine steel.
- 2 Note angle of cutting needle.
- 3 Note absence of excessive sparking at point of contact.
- 4 Wound edges dry and covered with fine film of coagulum.
- 5 First incisional depth does not extend below subcutaneous fat.

Marconi Instruments Ltd. now have in production a wide range of Diathermy electro-surgical equipments designed for Ophthalmic, Brain, Urological and General Surgery. Full particulars, together with information upon their applications, are freely available on request.
