

CONTENTS

Volume 53 Number 1

Research Papers

- 1 CHUNMAO HUANG. Moments for multidimensional Mandelbrot cascades
- 22 QING-PEI ZANG AND LI-XIN ZHANG. A general lower bound of parameter estimation for reflected Ornstein–Uhlenbeck processes
- 33 FÉLIX BELZUNCE, CAROLINA MARTÍNEZ-RIQUELME, JOSÉ M. RUIZ AND MIGUEL A. SORDO. On sufficient conditions for the comparison in the excess wealth order and spacings
- 47 YINPING YOU AND XIAOHU LI. Ordering scalar products with applications in financial engineering and actuarial science
- 57 MATHEW D. PENROSE. The strong giant in a random digraph
- 71 N. PACKHAM, M. KALKBRENER AND L. OVERBECK. Asymptotic behaviour of multivariate default probabilities and default correlations under stress
- 82 EVA FERREIRA AND WINFRIED STUTE. Dynamic binomials with an application to gender bias analysis
- 91 FABIÁN CROCCE AND ERNESTO MORDECKI. A finite exact algorithm to solve a dice game
- 106 MICHAEL N. KATEHAKIS, LAURENS C. SMIT AND FLOSKE M. SPIEKSMAN. A comparative analysis of the successive lumping and the lattice path counting algorithms
- 121 CHRISTIAN SCHLUTER AND MARK TREDE. Weak convergence to the Student and Laplace distributions
- 130 MIRIAM ISABEL SEIFERT. Weakening the independence assumption on polar components: limit theorems for generalized elliptical distributions
- 146 GENNADY SAMORODNITSKY, SIDNEY RESNICK, DON TOWSLEY, RICHARD DAVIS, AMY WILLIS AND PHYLLIS WAN. Nonstandard regular variation of in-degree and out-degree in the preferential attachment model
- 162 KRZYSZTOF JASIŃSKI AND TOMASZ RYCHLIK. Inequalities for variances of order statistics originating from urn models
- 174 HYUNJU LEE AND JI HWAN CHA. Point process approach to modeling and analysis of general cascading failure models
- 187 NGUYEN HUU DU, DANG HAI NGUYEN AND G. GEORGE YIN. Conditions for permanence and ergodicity of certain stochastic predator–prey models
- 203 FRANK BALL, TOM BRITTON AND PETER NEAL. On expected durations of birth–death processes, with applications to branching processes and SIS epidemics
- 216 WALTER A. F. DE CARVALHO, SANDRO GALLO AND NANCY L. GARCIA. Continuity properties of a factor of Markov chains
- 231 S. MCKINLAY AND K. BOROVKOV. On explicit form of the stationary distributions for a class of bounded Markov chains
- 244 ANDERS RØNN-NIELSEN AND EVA B. VEDEL JENSEN. Tail asymptotics for the supremum of an infinitely divisible field with convolution equivalent Lévy measure
- 262 A. FERREIRO-CASTILLA, A. E. KYPRIANOU AND R. SCHEICHL. An Euler–Poisson scheme for Lévy driven stochastic differential equations
- 279 PARISA FATHEDDIN AND JIE XIONG. Moderate deviation principle for a class of stochastic partial differential equations

Short Communications

- 293 PATRICK BUCKINGHAM, BRIAN FRALIX AND OFFER KELLA. A note on integral representations of the Skorokhod map
- 299 Y. H. MAO, C. ZHANG AND Y. H. ZHANG. Separation cutoff for upward skip-free chains
- 307 ZHENLONG GAO AND YANHUA ZHANG. Limit theorems for a supercritical Poisson random indexed branching process

Research Papers

- 315 SERVET MARTÍNEZ. A stationary distribution associated to a set of laws whose initial states are grouped into classes. An application in genomics
- 327 YANQING HU. Generalized Efron's biased coin design and its theoretical properties
- 341 ERIK EKSTRÖM AND MARTIN VANNESTÅL. Momentum liquidation under partial information
- 360 NAYEREH BAGHERI KHOOLENJANI AND MOHAMMAD HOSSEIN ALAMATSAZ. Extension of de Bruijn's identity to dependent non-Gaussian noise channels
- 369 E. D. ANDJEL AND L. F. GRAY. Extreme paths in oriented two-dimensional percolation
- 381 GABRIEL BERZUNZA AND JUAN CARLOS PARDO. Asymptotic behaviour near extinction of continuous-state branching processes
- 392 J. JAKUBOWSKI AND A. PYTEL. The Markov consistency of Archimedean survival processes
- 410 GARETH O. ROBERTS AND JEFFREY S. ROSENTHAL. Complexity bounds for Markov chain Monte Carlo via diffusion limits
- 421 RAMTIN PEDARSANI AND JEAN WALRAND. Stability of multiclass queueing networks under longest-queue and longest-dominating-queue scheduling
- 434 CHEN CHEN AND HOSAM MAHMOUD. Degrees in random self-similar bipolar networks
- 448 M. GANNON, E. PECHERSKY, Y. SUHOV AND A. YAMBARTSEV. Random walks in a queueing network environment
- 463 KATJA GABRYSCH. Convergence of directed random graphs to the Poisson-weighted infinite tree
- 475 MARIA DEIJFEN AND NINA GANTERT. Routeing on trees
- 489 PETER NEAL. A household SIR epidemic model incorporating time of day effects
- 502 RYOUTA KOZAKAI, AKINOBU SHIMIZU AND MORIHIRO NOTOHARA. Convergence to the structured coalescent process
- 518 J. MALMROS, F. LILJEROS AND T. BRITTON. Respondent-driven sampling and an unusual epidemic
- 531 JE GUK KIM. Optimal importance sampling for the Laplace transform of exponential Brownian functionals
- 543 JAMES C. FU AND TUNG-LUNG WU. Boundary crossing probabilities for high-dimensional Brownian motion
- 554 MI CHEN AND KAM CHUEN YUEN. Optimal dividend and reinsurance in the presence of two reinsurers
- 572 ERIK J. BAURDOUX, JUAN CARLOS PARDO, JOSÉ LUIS PÉREZ, AND JEAN-FRANÇOIS RENAUD. Gerber–Shiu distribution at Parisian ruin for Lévy insurance risk processes

Short Communications

- 585 SERGIO I. LÓPEZ. Convergence of tandem Brownian queues
- 593 MAGDA PELIGRAD AND SERGEY UTEV. On the invariance principle for reversible Markov chains
- 600 JEVGENIJS IVANOV. Sparre Andersen identity and the last passage time
- 606 JOSEBA DALMAU. Distribution of the quasispecies for a Galton–Watson process on the sharp peak landscape
- 614 K. B. ATHREYA AND H.-J. SCHUH. A Galton–Watson process with a threshold
- 622 EMMANUELLE ANCEAUME, YANN BUSNEL, ERNST SCHULTE-GEERS AND BRUNO SERICOLA. Optimization results for a generalized coupon collector problem
- 630 EVE D. LATHROP, ISAAC H. GOLDSTEIN AND YUNG-PIN CHEN. A note on a generalized Ehrenfest urn model: another look at the mean transition times

Research Papers

- 633 Z. I. BOTEV, A. RIDDER AND L. ROJAS-NANDAYAPA. Semiparametric cross entropy for rare-event simulation
- 650 ANTON MURATOV AND SERGEI ZUYEV. Bit flipping and time to recover
- 667 EVANGELOS KRANAKIS AND GENNADY SHAIKHET. Sensor allocation problems on the real line
- 688 FREDRIK OLSSON AND TATYANA S. TUROVA. Ergodicity of age-dependent inventory control systems
- 700 FRASER DALY. Compound geometric approximation under a failure rate constraint
- 715 GUANGXIN JIANG AND MICHAEL C. FU. Quantile sensitivity estimation for dependent sequences
- 733 ADRIEN HITZ AND ROBIN EVANS. One-component regular variation and graphical modeling of extremes
- 747 TAKIS KONSTANTOPOULOS, ZHENXIA LIU AND XIANGFENG YANG. Laplace transform asymptotics and large deviation principles for longest success runs in Bernoulli trials
- 765 GEROLD ALSMEYER AND ALEXANDER MARYNYCH. Renewal approximation for the absorption time of a decreasing Markov chain
- 783 ERIC FOXALL. The SEIS model, or, the contact process with a latent stage
- 802 JYY-I HONG. Coalescence on critical and subcritical multitype branching processes
- 818 ONNO BOXMA, MICHEL MANDJES AND JOSH REED. On a class of reflected AR(1) processes
- 833 CHRISTIAN HIRSCH. Bounded-hop percolation and wireless communication
- 846 ANDREA COLLEVECCHIO, ABBAS MEHRABIAN AND NICK WORMALD. Longest paths in random Apollonian networks and largest r -ary subtrees of random d -ary recursive trees
- 857 VYTAUTĖ PILIPAUSKAITĖ AND DONATAS SURGAILIS. Anisotropic scaling of the random grain model with application to network traffic
- 880 KATJA GABRYSCH. Distribution of the smallest visited point in a greedy walk on the line
- 888 BOJAN BASRAK AND DRAGO ŠPOLJARIĆ. On randomly spaced observations and continuous-time random walks
- 899 IRENE CRIMALDI. Central limit theorems for a hypergeometric randomly reinforced urn
- 914 ERIK THÖRNBLAD. The dominating colour of an infinite Pólya urn model

Short Communications

- 925 ACHILLEFS TZIOUFAS. The entirely coupled region of supercritical contact processes
- 930 MARK BROWN AND SHELDON M. ROSS. Optimality results for coupon collection
- 938 K. BRUCE ERICKSON. Uniqueness of the null solution to a nonlinear partial differential equation satisfied by the explosion probability of a branching diffusion
- 946 LOIĆ HERVÉ AND JAMES LEDOUX. Computable bounds of an ℓ^2 -spectral gap for discrete Markov chains with band transition matrices
- 953 MARTIN MÖHLE AND MORIHIRO NOTOHARA. An extension of a convergence theorem for Markov chains arising in population genetics

Research Papers

- 957 R. MARTYR. Solving finite time horizon Dynkin games by optimal switching
- 974 ALEXANDER KATZUR AND UDO KAMPS. Order statistics with memory: a model with reliability applications
- 989 A. MAHESHWARI AND P. VELLAISAMY. On the long-range dependence of fractional Poisson and negative binomial processes
- 1001 VENKAT ANANTHARAM AND FRANÇOIS BACCELLI. The Boolean model in the Shannon regime: three thresholds and related asymptotics
- 1019 CRISTIAN F. COLETTI, KARINA B. E. DE OLIVEIRA AND PABLO M. RODRIGUEZ. A stochastic two-stage innovation diffusion model on a lattice
- 1031 ROBERT R. WILKINSON, FRANK G. BALL AND KIERAN J. SHARKEY. The deterministic Kermack–McKendrick model bounds the general stochastic epidemic
- 1041 PIETER C. ALLAART AND JOSÉ A. ISLAS. A sharp lower bound for choosing the maximum of an independent sequence
- 1052 GOLSHID BAHARIAN, ARASH KHATIBI AND SHELDON H. JACOBSON. Sequential stochastic assignment problem with time-dependent random success rates
- 1064 JEAN MAIRESSE AND PASCAL MOYAL. Stability of the stochastic matching model
- 1078 GAGANDEEP SINGH, U. C. GUPTA AND M. L. CHAUDHRY. Detailed computational analysis of queueing-time distributions of the BMAP/G/1 queue using roots
- 1098 TUĞRUL DAYAR AND M. CAN ORHAN. Steady-state analysis of a multiclass MAP/PH/c queue with acyclic PH retrials
- 1111 DEBANKUR MUKHERJEE, SEM C. BORST, JOHAN S. H. VAN LEEUWAARDEN AND PHILIP A. WHITING. Universality of load balancing schemes on the diffusion scale
- 1125 JENNIFER SOMMER, HANS DADUNA AND BERND HEIDERGOTT. Nonergodic Jackson networks with infinite supply—local stabilization and local equilibrium analysis
- 1143 GIACOMO PLAZZOTTA AND CAROLINE COLIJN. Asymptotic frequency of shapes in supercritical branching trees
- 1156 NICOLAS GROSJEAN AND THIERRY HUILLET. On a coalescence process and its branching genealogy
- 1166 XIN HE AND ZENGHU LI. Distributions of jumps in a continuous-state branching process with immigration
- 1178 ALEXANDER IKSANOV AND ZAKHAR KABLUCHKO. A central limit theorem and a law of the iterated logarithm for the Biggins martingale of the supercritical branching random walk
- 1193 A. D. BARBOUR, P. CHIGANSKY AND F. C. KLEBANER. On the emergence of random initial conditions in fluid limits
- 1206 PATRIZIA BERTI, IRENE CRIMALDI, LUCA PRATELLI AND PIETRO RIGO. Asymptotics for randomly reinforced urns with random barriers
- 1221 NEERAJA SAHASRABUDHE. Synchronization and fluctuation theorems for interacting Friedman urns
- 1240 YI-SHEN LIN. A generalization of the Mabinogion sheep problem of D. Williams

Short Communications

- 1257 STEFAN KASSBERGER AND THOMAS LIEBMANN. An alternative axiomatic characterisation of pricing operators
- 1265 SHELDON M. ROSS. Improved Chen–Stein bounds on the probability of a union
- 1271 Correction

Subscription rates

Subscription rates for volume **53** (2016) of *Journal of Applied Probability (JAP)* are as follows (post free and online access at <http://cambridge.org/jpr>). For libraries and institutions: US\$344.00, £222.00 (online only); US\$378.00, £244.00 (online & print). For individuals, US\$130.00, £84.00 (online & print). The subscription rates for volume **48** (2016) of *Advances in Applied Probability*, the companion publication, are the same; for individual subscribers that order both journals at the same time, the combined price is discounted by 10%. Please send all subscription renewals and enquiries to: subscriptions_newyork@cambridge.org in the Americas and journals@cambridge.org for the Rest of the World.

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability (JAP)* or *Advances in Applied Probability (AAP)*. Longer papers are typically published in AAP, but the assignation of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as portable document format (PDF) files, not exceeding 1 Mb, to the email address submissions_japaap@sheffield.ac.uk. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/16
