## AIMS AND SCOPE

The Journal of Pension Economics and Finance serves as a forum for the international debate on pension provision.

The Journal primarily publishes original research articles with a substantive economics and finance content. It also accepts "Issues and Policy" articles which review the state of knowledge or the debate in particular areas. The Journal will be independent of any particular school of thinking on pensions issues. Articles from actuarial science and other disciplines are welcome as long as there is a clear economics and finance context.
