

## NEW AND/OR INTERESTING IN MICROSCOPY

- ✓ A new company has been formed that offers photographic quality **printers and other video-related products** to the microscopy market. **VITAL IMAGE TECHNOLOGY** was founded by Bob Benish, Dennis DiPirro and Scott Taylor formally with Codonics, and Jim Yankovich formally with Semicaps. V.I.T. offers complete sales and service including installation for all **SEIKOSHA** and **MITSUBISHI** products. California office: (916)687-7913. Ohio office: (216)951-6717.
- ✓ New **LINK GEM** high purity Germanium detector with guaranteed resolution of 115 eV at Manganese and 65 eV at Fluorine. Oxford Instruments: U.S Tel.: (800)255-1978, Canada Tel.: (416)568-9188.
- ✓ The new **CARBONIC SNOW JET** system cleans particulate and hydrocarbon contamination from sample surfaces without sample damage. Fingerprints removed easily. XEI Scientific, Tel.: (415)369-0133.
- ✓ New **MOCHA® Image Analysis Software for Windows** turns images into meaningful data precisely, reproducibly, and automatically. Quantifies intensities and morphometries of cells, particles, fibers, materials, autoradiograms, and other applications where images are routinely measured. From Jandel Scientific: (415)453-6700.

## USED EQUIPMENT FOR SALE

- ✓ **MILITARY RESEARCH LAB IS CLOSING:** Lab is selling a **Sorvall MT-2B** ultramicrotome, **Bausch and Lomb** stereo microscopes, and **Bausch and Lomb** measuring microscopes that allow operators to measure the size of microscope samples. All are being sold at very low prices. Tel.: (202) 544-0836
- ✓ **HITACHI H-600AB TEM II** with **Kevex Delta Asbestos Analyzer** - for TEM image, diffraction and EDX chemical analysis. Includes interface kit, double tilt holder and water chiller. Interested parties contact Stephen A. Jaraczewski at (201)569-6708.
- ✓ **ZEISS STANDARD UNIVERSAL** Reflected-light Microscope; trinocular, camera attachments, special illuminator, optovar, 6 epilan HD objectives, macro attachments, much more. **EXCELLENT CONDITION.** \$5500 OBO. (414)283-2007. microANALYTICAL, P.O. Box 17371, Milwaukee, WI 53217.
- ✓ **JEOL 733 SUPERPROBE** with 5 WDS and NORAN EDS. Excellent Condition. \$100,000
- ✓ **JEOL 1200 EX TEMSCAN** Analytical Electron Microscope with NORAN EDS. Excellent condition. \$125,000
- ✓ **CLASS 100 CLEANROOM** Facility, 500 sq. ft., benches, Class 100 fumehood; pressure, temp, humidity controlled. \$45,000  
Contact: Donald A. Brooks, McCrone Associates: (708)887-7100.
- ✓ **NanoScope II AFM & STM.** AFM comes with a 12 μ scanner and STM with a 1 μ and 12 μ scanner. Can help with training. (805)899-3535.

## More Help?

*Thanks to a number of our readers that have assisted in improving our mailing list. In these cases, we have supplied a list of all at their establishment for their correction - by deleting those no longer there and by verifying and/or correcting the internal mailing addresses (Dept., Bldg, Rm, etc). We would greatly appreciate all additional help in this area.*

*Also - a "number" between your name and the barcode on your mailing label indicates that the U.S. Postal Service does not consider that address valid for the following reasons:*

- # Reason:
- 6 The street address is ambiguous or no street address is provided.
  - 7 There are no near or exact matches for the street name for that zipcode (or in any geographically related zipcode).
  - 10 The street number is out of range for the street or the PO Box number is out of range for the zipcode.
  - 12 The street name is not close enough to be accepted. The number may be OK and the name may be close.
  - 13 There are multiple street matches in the same zipcode. Typical are without proper "N", "S", etc. designations.
  - 14 Same as 13 but with multiple zipcodes.
  - 18 An error in the Post Office software.

*Your help in correcting your address would be appreciated - as it will reduce our postage costs and will result in a faster and more reliable delivery.*

- - - Ed.

### TO A YOUNG SCIENTIST:

*If you want to get published, then heed this advice:  
Cite your friends at least once and your enemies twice,  
The editor three times, yourself at least four,  
And write in a style that's intended to bore.  
If you want to get published, here's what you must do  
Above all: don't come up with anything new.*
