MCMLI

“ In adopting our title of the *Journal of Mental Science, published by authority of the Medico-Psychological Association*, we profess that we cultivate in our pages mental science of a particular kind, namely, such mental science as appertains to medical men who are engaged in the treatment of the insane. But it has been objected that the term mental science is inapplicable, and that the term mental physiology or mental pathology, or psychology, or psychiatry (a term much affected by our German brethren), would have been more correct and appropriate; and that, moreover, we do not deal in mental science, which is properly the sphere of the aspiring metaphysical intellect. If mental science is strictly synonymous with metaphysics, these objections are certainly valid; for although we do not eschew metaphysical discussion, the aim of this JOURNAL is certainly bent upon more attainable objects than the pursuit of those recondite inquiries which have occupied the most ambitious intellects from the time of Plato to the present, with so much labour and so little result. But while we admit that metaphysics may be called one department of mental science, we maintain that mental physiology and mental pathology are also mental science under a different aspect. While metaphysics may be called speculative mental science, mental physiology and pathology, with their vast range of inquiry into insanity, education, crime, and all things which tend to preserve mental health, or to produce mental disease, are not less questions of mental science in its practical, that is in its sociological point of view. If it were not unjust to high mathematics to compare it in any way with abstruse metaphysics, it would illustrate our meaning to say that our practical mental science would fairly bear the same relation to the mental science of the metaphysicians as applied mathematics bears to the pure science. In both instances the aim of the pure science is the attainment of abstract truth; its utility, however, frequently going no further than to serve as a gymnasium for the intellect. In both instances the mixed science aims at, and, to a certain extent, attains immediate practical results of the greatest utility to the welfare of mankind; we therefore maintain that our JOURNAL is not inaptly called the *Journal of Mental Science*, although the science may only attempt to deal with sociological and medical inquiries, relating either to the preservation of the health of the mind or to the amelioration or cure of its diseases; and although not soaring to the height of abstruse metaphysics, we only aim at such metaphysical knowledge as may be available to our purposes, as the mechanician uses the formularies of mathematics. This is our view of the kind of mental science which physicians engaged in the grave responsibility of caring for the mental health of their fellow-men may, in all modesty, pretend to cultivate; and while we cannot doubt that all additions to our certain knowledge in the speculative department of the science will be great gain, the necessities of duty and of danger must ever compel us to pursue that knowledge which is to be obtained in the practical departments of science with the earnestness of real workmen. The captain of a ship would be none the worse for being well acquainted with the higher branches of astronomical science, but it is the practical part of that science as it is applicable to navigation which he is compelled to study.”—*Sir J. C. Bucknill, M.D., F.R.S. (Journ. Ment. Sci., vol. vii, 1861, p. 137).*

Made and Printed in Great Britain.

JOURNAL OF MENTAL SCIENCE

CONTENTS FOR OCTOBER, 1951

Original Articles—	PAGE
Activators and Inhibitors of Hexokinase in Human Blood ; by <i>H. Weil-Malherbe, M.D., D.Sc., and A. D. Bone</i>	635
Glutamic Acid and Its Salts in <i>Petit Mal</i> Epilepsy ; by <i>D. A. Pond, M.R.C.P., D.P.M., and M. H. Pond, M.A., M.B., B.Chir.</i>	663
Glutamic Acid and Glucose as Substrates for Mammalian Brain ; by <i>H. McIlwain, D.Sc., Ph.D.</i>	674
An Evaluation of the Rorschach Test as a Prognostic Aid in the Treatment of Schizophrenia by Insulin Coma Therapy, Electronarcosis, Electroconvulsive Therapy and Leucotomy ; by <i>W. Linford Rees, M.D., B.Sc., M.R.C.P., D.P.M., and A. M. Jones, B.A., B.Ed.</i>	681
Quantitative Evaluation of Psycho-Social Phenomena in Small Groups ; by <i>F. Kräupl Taylor, M.D., D.P.M.</i>	690
Cytochrome C in Senile and Arteriosclerotic Dementia ; by <i>W. Forster, M.B., B.S., D.P.M., and E. J. G. Bradford, M.Sc.</i>	718
Studies in Learning Impairment. I: Schizophrenic and Organic Patients ; by <i>K. R. L. Hall, M.A., D.Phil., and T. G. Crookes, M.A.</i>	725
Maternal Age in Familial Mongolism ; by <i>L. S. Penrose, M.A., M.D., L.R.C.P.</i>	738
An Experimental Approach to Diagnostic Psychological Testing ; by <i>M. B. Shapiro, M.A.</i>	748
The Problem of "Orality" and of its Origin in Early Childhood ; by <i>Frieda Goldman-Eisler, Ph.D.</i>	765
Anomalous Physical Signs of Bodily Disease in Mental Deficiency ; by <i>Brian H. Kirman, M.D., D.P.M.</i>	783
The Pathogenesis of Somatic Disease in Mental Defectives ; by <i>L. Crome, M.C., M.R.C.P.Ed.</i>	792
Studies in the Physiology of Awareness : The Incidence and Content of Dream Patterns and Their Relationship to Anoxia ; by <i>J. W. Lovett Doust, B.Sc., M.B., B.S.Lond., M.R.C.P.</i>	801
Clinical Electrocardiography with an Electroencephalograph ; by <i>Walter Fabisch, M.D.Berlin, M.R.C.P., D.T.M.&H., D.P.M., and E. G. Williams</i>	812
Reviews	815
Character Analysis ; by <i>Wilhelm Reich, M.D.</i> —Klinische Psychopathologie ; by <i>Kurt Schneider</i> .—Technique of Psychoanalytic Therapy ; by <i>Sandor Lorand, M.D.</i> —Endocrine Diagnosis ; by <i>H. Ucko</i> . Etudes Psychiatriques. 2 : Aspects Séméiologiques ; by <i>Henry Ey</i> .	
Bibliography and Epitome	818
1. Pharmacology and Treatment.—2. Biochemistry, Physiology, etc.
