

FORTHCOMING PAPERS

The following papers have been accepted for publication in forthcoming issues. Further details are available **from the corresponding author** where an e-mail address or fax number is given. A regularly updated list is available by anonymous ftp: the URL is **ftp://ftp.shef.ac.uk/pub/uni/companies/apt**. Further information about the Applied Probability Trust and its publications is available on the World Wide Web. Our home page has the URL **http://www.shef.ac.uk/apt/**

- ANDJEL, E. and SCHINAZI, R.** A complete convergence theorem for an epidemic model
- ASMUSSEN, SØREN and KELLA, OFFER** Rate modulation in dams and ruin problems • *asmus@maths.lth.se*
- ASYMONT, I. M., FAYOLLE, G. and MENSHIKOV, M. V.** Random walks in a quarter plane with zero drifts: transience and recurrence • *guy.fayolle@inria.fr*
- BANJEVIC, D.** Recurrent relations for distribution of waiting time in Markov chain
- BARBOUR, A. D. and BROWN, TIMOTHY C.** Approximate versions of Melamed's theorem • *tim@stats.mu.oz.au*
- BLASZCZYSZYN, BARTLOMIEJ and ROLSKI, TOMASZ** Expansions for Markov-modulated systems and approximations of ruin probability • *rolski@math.uni.wroc.pl*
- BOROVKOV, K. A.** On crossing times for multidimensional walks with skip-free components • *kostya@stats.mu.oz.au*
- BOROVKOV, ALEXANDER A.** Asymptotic expansions for functionals of dilation of point processes
- BOROVKOV, K. and PFEIFER, D.** On improvements of the order of approximation in the Poisson limit theorem
- BOROVKOV, K. A. and VATUTIN, V. A.** On distribution tails and expectations of maxima in critical branching processes
- BÖHM, W. and PANNY, W.** Simple random walk statistics Part II: Continuous time results
- CAMPBELL, L. L., MCKELLIPS, A. L. and WITTKE, P. H.** Distributions and expectations of singular random variables • *campbell@llc.mast.queens.ca*
- CHAO, XIULI and DAI, LIYI** A monotonicity result for a single server loss system • *chao@hertz.njit.edu*
- CHAUDHRY, M. L. and GUPTA, U. C.** Performance analysis of the discrete time $GI/Geom/1/N$ queue • *math@rmc.ca*
- CHEN, HONG** Rate of convergence of the fluid approximation for generalized Jackson networks
- CHEN, TUHAO and SENETA, E.** Multivariate Bonferroni-type bounds
- COHEN, ARTHUR and SACKROWITZ, HAROLD B.** On stochastic ordering of random vectors • *ACOHEN@zodiac.rutgers.edu*
- COHEN, URI and WEISSMAN, ISHAY** The extremal index and clustering of high values for derived stationary sequences
- COMMAULT, C. and CHEMLA, J. P.** An invariant property of phase-type representations and some applications • *chemla@univ-tours.fr*

- COURCOUBETIS, COSTAS and WEBER, RICHARD** Buffer overflow asymptotics for a switch handling many traffic sources • *rrw1@statslab.cam.ac.uk*
- COWAN, RICHARD, YU, PHILIP L. H. and FERGUSON, THOMAS S.** Restrictions on the saddle-point solution in the game of teaball
- DHAR, SUNIL K. and JIANG, XULUN** Probability bounds on the finite sum of the binary sequence of order k • *sunidh@stat.njit.edu*
- DOBROW, ROBERT P.** On the distribution of distances in recursive trees
- DOMINÉ, MARCO** Moments of the first passage time of a Wiener process with drift between two elastic barriers • *Marco.Domine@Mathematik.Uni-Magdeburg.de*
- DOMINÉ, MARCO** First passage time distribution of a Wiener process with drift concerning two elastic barriers • *Marco.Domine@Mathematik.Uni-Magdeburg.de*
- DU, CHARLES** A monotonicity result for a single server queue subject to a Markov modulated Poisson process
- DUFFIELD, N. G.** Economies of scale in queues with sources having power-law large deviation scalings • *duffieldn@dcu.ie*
- FALIN, G.** A heterogeneous blocking system in a random environment
• *falin@nw.math.msu.su*
- FERRARI, P. A. and FONTES, L. R. G.** Poissonian approximation for the tagged particle in asymmetric simple exclusion • *pablo@ime.usp.br*
- GANI, JOSEPH and YAKOWITZ, SID** Error bounds for deterministic approximations to Markov processes, with applications to epidemic models
- GESKE, MARK X., GODBOLE, ANANT P., SCHAFFNER, ANDREW A., and SKOLNICK, ALLISON M.** Compound Poisson approximations for word patterns under Markovian hypotheses • *anant@math.mtu.edu*
- GLASSERMAN, PAUL and YAO, DAVID D.** Stochastic vector difference equations with stationary coefficients
- GNEDIN, ALEXANDER V.** On the full information best-choice problem
- GOLDSTEIN, LARRY and RINOTT, YOSEF** Multivariate normal approximations by Stein's method and size bias couplings • *lgoldste@hto.usc.edu*
- GOSELIN, FRÉDÉRIC** Two classes of subcritical population-size-dependent Bienaymé–Galton–Watson branching processes • *gosselin@cefe.cnrs-mop.fr*
- GRIPENBERG, GUSTAF and NORROS, ILKKA** On the prediction of fractional Brownian motion • *Gustaf.Gripenberg@helsinki.fi*
- GRUET, J.-C. and SHI, Z.** Some asymptotic results for exponential functionals of Brownian motion
- GUILLEMIN, FABRICE, MAZUMDAR, RAVI R. and SIMONIAN, ALAIN** On heavy traffic approximations for transient characteristics of $M/M/\infty$ queues
• *guillemin@lannion.cnet.fr*
- HAIGH, JOHN** More on n -point, win-by- k games • *J.Haigh@sussex.ac.uk*
- HANIN, L. G., KLEBANOV, L. B. and YAKOVLEV, A. YU.** Randomized multihit models and their identification • *guest0@mathlab.mtu.edu*
- HAUKAS, HARALD and AVEN, TERJE** A general formula for the downtime distribution of a parallel system
- HEYMAN, DANIEL P.** A decomposition theorem for infinite stochastic matrices
- HO, HWAI-CHUNG and HSING, TAIEN** On the asymptotic joint distribution of the sum and maximum of stationary normal random variables • *thsing@stat.tamu.edu*
- HSU, IVY and WALRAND, JEAN** Dynamic bandwidth allocation for ATM switches
- HU, TAIZHONG** Stochastic comparisons of order statistics under multivariate imperfect repair

Forthcoming papers

- HÜSLER, J. and SCHMIDT, M. A note on the point processes of rare events
- JACKA, S. D. and ROBERTS, G. O. Weak convergence of conditioned processes on a countable state space • s.d.jacka@csv.warwick.ac.uk

- SESHADRI, SRIDHAR A** A sample path analysis of the delay in the $M/G/C$ system
• *sseshadr@stern.nyu.edu*
- SGIBNEV, M. S.** Markov renewal functions
- SHEU, SHEY-HUEI** A modified block replacement policy with two variables and general random minimal repair cost
- TAIBI, DJAOUAD** Une généralisation du modèle de diffusion de Bernoulli–Laplace
• *taibi@univ-rouen.fr*
- TSAKLIDIS, G.** The evolution of the attainable structures of a continuous time homogeneous Markov system with fixed size
- VAN DEN BERG, J.** A note on disjoint-occurrence inequalities for marked Poisson point processes
- VELLAISAMY, P. and CHAUDHURI, B.** Poisson and compound Poisson approximations for random sums of random variables • *bikram@cc.iitb.ernet.in*
- VOIT, M.** Asymptotic distributions for the Ehrenfest urn and related random walks
- WARREN, DI and SENETA, E.** Peaks and Eulerian numbers in a random sequence
• *seneta_e@maths.su.oz.au*
- WEISSMAN, ISHAY** Records from a power model of independent observations
- WILLMOT, GORDON E.** A nonexponential generalization of an inequality arising in queueing and insurance risk
- YAO, YI-CHING** On Kingman's characteristic functional approach to Rényi's characterization of Poisson processes • *yao@statsun.stat.colostate.edu*
- ZHANG, YU** Continuity of percolation probability in $\infty + 1$ dimensions

Forthcoming papers

ZHAO, Y. QUENNEL and LIU, DANIELLE The censored Markov chain and the best augmentation

A similar list of papers accepted for publication in *Advances in Applied Probability* now appears at the end of each issue of that journal.

JOURNAL OF TIME SERIES ANALYSIS

Edited by M B Priestley

The **Journal of Time Series Analysis** is sponsored by the Bernoulli Society for Mathematical Statistics and Probability. Papers published in the journal cover all aspects of time series analysis dealing with theory and methodology, and with applications to diverse fields, such as physics, engineering, control theory, economics and biology.

Recent articles include:

Statistical Analysis of Economic Time Series via Markov Switching Models
Robert E. McCulloch and Ruey S. Tsay

Using the Mutual Information Coefficient to Identify Lags in Nonlinear Models
Clive Granger and Jin-Lung Lin

The Number of Peaks in a Stationary Sample and Orthant Probabilities
Simon Ku and Eugene Seneta

Periodic Correlation in Stratospheric Ozone Data
Peter Bloomfield, Harry L. Hurd and Robert B. Lund

SCANDINAVIAN JOURNAL OF STATISTICS

Edited by Dag Tjøstheim

International in scope and readership, **SJS** is recognized as one of the leading statistical journals. It specializes in statistical modelling showing particular appreciation of the underlying substantive research problems.

The emergence of specialized methods for analyzing longitudinal and spatial data is just one example of an area of important methodological development in which **SJS** has a particular niche.

Forthcoming highlights:

On phase type distributions in survival analysis

O. Aalen

m-Dependent random fields with analytic cumulant-generating function

F. Götze, L. Heinrich and C. Hipp

Estimation of a monotone density or monotone hazard under random censoring

J. Huang and J. A. Wellner

Coupling methods in probability

H. Thorisson

MATHEMATICAL FINANCE

AN INTERNATIONAL JOURNAL OF MATHEMATICS,
STATISTICS & FINANCIAL ECONOMICS

Edited by Stanley R. Pliska
University of Illinois at Chicago

Mathematical aspects of finance theory have, in the past, been scattered throughout publications in finance, economics, mathematics and statistics. ***Mathematical Finance*** remedies this by acting as a primary forum for finance researchers, finance practitioners and mathematical scientists. The journal provides clear and concise articles which present the latest theoretical studies in readable and accessible prose.

Also featuring book and software reviews, ***Mathematical Finance*** offers new research on the financial applications of statistical and econometric methods; numerical analysis and computational methods; and modern developments in Stochastic Processes, Game Theory, and Optimization Theory.

ISSN 0960-1627, Published Quarterly

ADVANCES IN APPLIED PROBABILITY

The main function of AAP is to define areas of recent progress and potential development in applied probability. The Editorial Board would like to encourage the submission of review papers summarising and coordinating recent results. In addition to review papers, AAP is also a medium of publication for

- longer research papers, which may include expository material
- expository papers on branches of mathematics of interest to probabilists
- papers outlining areas in which probability models can be usefully developed
- papers presented at conferences which do not publish their proceedings
- letters to the editor on any appropriate topic

AAP now also includes a section devoted to stochastic geometry and statistical applications. Volume 27 Number 3 of AAP contains the following papers:

Stochastic Geometry and Statistical Applications

A. J. CABO and A. J. BADDELEY. Line transects, covariance functions and set convergence
R. V. AMBARTZUMIAN. Measure generation by Euler functionals
JASON J. BROWN. A bootstrap algorithm for the isotropic random sphere
JASON J. BROWN. A central limit theorem for the isotropic random sphere

General Applied Probability

HARRY KESTEN. A ratio limit theorem for (sub) Markov chains on $\{1, 2, \dots\}$ with bounded jumps
P. WHITTLE. Large-deviation expressions for the distribution of first-passage coordinates
IOANNIS I. GERONTIDIS. Markov population replacement processes
XI-REN CAO. Event coupling and performance sensitivity analysis of generalized semi-Markov processes
S. T. RACHEV and L. RÜSCHENDORF. Probability metrics and recursive algorithms
B. FORTE and E. R. VRSCAY. Solving the inverse problem for measures using iterated function systems: a new approach
GIDEON WEISS. On almost optimal priority rules for preemptive scheduling of stochastic jobs on parallel machines
M. MARTIN and J. R. ARTALEJO. Analysis of an $M/G/1$ queue with two types of impatient units
FABRICE GUILLEMIN and ALAIN SIMONIAN. Transient characteristics of an $M/M/\infty$ system

Subscription rates (per volume) for AAP are the same as for JAP (see the inside back cover). A discount of 10% is allowed to subscribers who order both journals at the same time directly from the Applied Probability Office. A detailed price list, including back issues, is available on request. Payment by credit card or by cheque (on a UK, US or Australian bank) is accepted.

All orders, enquiries, submissions and correspondence should be sent to:

Executive Editor, Applied Probability
School of Mathematics and Statistics
The University, Sheffield S3 7RH, UK

SUBSCRIPTION RATES

Subscription rates (post free) for the 1995 volume of the *Journal* are as follows:

US\$169.80; \$A237.000; £110.26 for libraries and institutions;

US\$56.60; \$A79.00; £36.85 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency.

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

(1) *research papers* not exceeding 20 printed pages;

(2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, longer research papers and letters to the editor are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
The University, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .10 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/95 \$00.70 + .10.
